# STRATEGIC BLUEPRINT FOR THE **NORTH WEST MINERALS PROVINCE**

The North West Minerals Province, centred on Mount Isa and Cloncurry, is one of the world's richest mineral-producing regions. However, cyclical and other factors have presented short and longer term challenges for the resources sector, the broader economy and communities in the region.

In 2015, the Government co-chaired a Taskforce with the Queensland Resources Council to investigate these issues and advise on a way forward. This work informed the development of the Strategic Blueprint for Queensland's North West Minerals Province.

The Blueprint provides more than \$39 million for a package of new measures to support the region by facilitating continued resources sector development, diversifying the economy, creating employment opportunities and delivering integrated and appropriate services.

The Queensland Government is committed to supporting regional communities in the North West Minerals Province and will continue to work with its partners to facilitate a smooth transition towards a strong and prosperous future.
