- 4. Budget Measures
- 5. Service Delivery Statements

Budget Highlights

A number of changes have been made to the Budget documents for 2008-09, to promote the accessibility and readability of the Budget documents.

One of these changes is the introduction of Budget Paper No. 4 - Budget Measures which provides comprehensive information on all significant Government policy decisions that involve changes to expense, capital and revenue activities since the previous Budget. This new document provides a comprehensive statement of new policy measures.

The former individual Ministerial Portfolio Statements are now combined into Budget Paper No. 5 - Service Delivery Statements. The revision will reduce duplication. Performance measures by output and agency financial statements and variance notes have been retained. The Service Delivery Statements will continue to provide the primary source of information for the hearings of the Parliamentary Estimates Committees.

To further improve the information in the Budget Papers in coming years, new measures will be incorporated in line with the proposed reforms of the *Financial Administration and Audit Act 1977* which are currently underway.

The Budget Papers are available online at www.budget.qld.gov.au or they can be purchased through The Queensland Government Bookshop, individually or as a set. Please phone (07) 3883 8700 (1800 801 123 for callers outside of Brisbane).

1. OVERVIEW

KEY POINTS

- Capital outlays in 2008-09 are estimated to be \$17 billion, an increase of 19.1% or \$2.723 billion on estimated actual 2007-08 capital outlays.
- The 2007-08 estimated capital outlays are 1.8% (\$257 million) higher than forecast in the 2007-08 Budget. Major contributors to this increase were the Department of Local Government, Sport and Recreation, the Department of Education, Training and the Arts, as well as increased spending on water.
- Capital outlays will support over 119,000 full-time jobs in Queensland.
- The Government's ongoing commitment to regional and rural Queensland is reflected in this Budget. Almost 56% of expenditure will occur outside the Brisbane Statistical Division, including \$37.5 million towards the redevelopment of Cairns, Mackay and Mount Isa hospitals, \$58.8 million for construction of new social rental housing and \$118.3 million for continuing work on the correctional centre near Mareeba.
- In 2008-09 there will be capital outlays of \$6.968 billion for transport and main roads including Northern Busway and the Gateway Upgrade Project, \$929.7 million for education, training and the arts, \$1.024 billion for health and \$516.9 million for housing.
- The capital outlays of the Public Non-Financial Corporations sector, including Government-owned corporations, constitute nearly 52% of total outlays in 2008-09, including \$3.108 billion in the energy sector.
- The Government will continue to invest in water infrastructure, with capital outlays of \$2.551 billion in 2008-09, including \$795 million for the Western Corridor Recycled Water Project, \$448.1 million to complete the South East Queensland Desalination Plant and \$442.3 million to progress development of the Traveston Crossing dam.

INTRODUCTION

This capital statement presents an overview of proposed capital outlays by the Queensland Government in 2008-09, as well as a summary of the Government's approach to infrastructure provision. Capital outlays in 2008-09 are estimated to be \$17 billion, net of a capital contingency reserve of \$950 million.

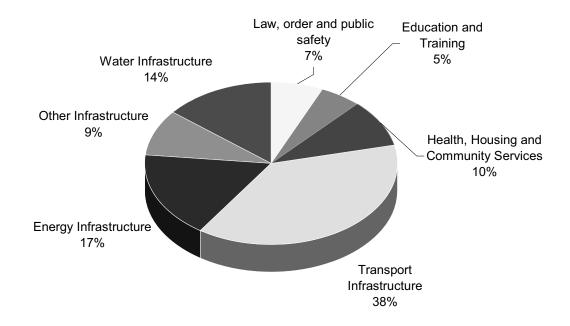

This represents an increase of 19.1% on estimated actual outlays in 2007-08 and reflects the Government's continuing significant investment in water infrastructure, increased expenditure on health, education and roads, progress with the *South East Queensland Infrastructure Plan and Program* (SEQIPP), as well as a number of other new capital investments.

Each year a major part of the Queensland Government's capital program is undertaken through the Public Non-financial Corporations (PNFC) sector (that is, commercial entities of Government, including Government-owned corporations and other authorities such as the water bodies, Forestry Plantations Queensland and Queensland Motorways Limited). For 2008-09, capital outlays of Queensland's PNFC sector will constitute nearly 52% of total outlays, reflecting major investments in water, electricity, rail and ports infrastructure.

Expenditure in 2008-09 is highest in the Brisbane Statistical Division – the most populated and one of the fastest growing areas of the State – planned at \$7.937 billion. However, consistent with the Government's commitment to building Queensland's regions, almost 56% of capital expenditure is expected to occur outside the Brisbane Statistical Division.

Capital outlays by purpose in 2008-09 are shown in Chart 1.1 below. Capital outlays by State Government entity are listed in Table 1.1.

| Anticipated Capital Contingency Reserve ⁴ | (800,000) | (950,000) | | | | |
| Total Capital Outlays | 14,285,482 | 17,007,998 | | | | |

Notes:

- 1. Includes associated statutory bodies.
- 2. Includes the Department of Infrastructure and Planning, Property Services Group and Airport Link.
- Includes the Department of Employment and Industrial Relations, Electoral Commission of Queensland, Office of the Governor, Office of the Ombudsman and Queensland Audit Office.
- 4. Contingency recognises that individual agencies may budget to fully expend their capital works allocations, however on a whole-of-Government basis, there is likely to be under spending, resulting in a carryover of capital allocations. The amount for 2008-09 has been revised upwards to reflect large increases in the capital program and in anticipation of industry capacity constraints in some areas.
- 5. Capital works outside of Queensland are not included in the capital program.
- 6. Numbers may not add due to rounding.

EMPLOYMENT GENERATION

The 2008-09 capital program will have a significant effect on employment, supporting over 119,000 full time jobs, either directly or indirectly. Estimated employment generation from budgeted capital expenditure in 2008-09 exceeds the forecast in the 2007-08 Capital Statement by over 8%. This increased employment is spread across the range of Government services. Employment generating capital does not include expenditure on land purchases, and plant and equipment.

CAPITAL GRANTS TO LOCAL GOVERNMENT AUTHORITIES

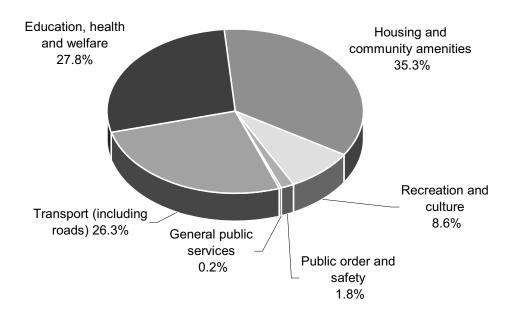

As highlighted in *Budget Paper 2 – Budget Strategy and Outlook*, the Queensland Government provides capital grants to local government authorities, ranging from capital works subsidies towards the costs of local public infrastructure to road subsidies for local roads, networks and drainage.

In 2007-08, approximately 75.4% (\$480.5 million) of total Queensland Government grants made to local government authorities were for capital purposes. Capital grants to local governments are expected to account for \$614 million, or 79.7% of total Queensland Government grants in 2008-09. The capital grant funding can be used for a range of purposes including roads and drainage, water and environment, and housing.

Queensland Government capital grants to local government authorities are shown in Chart 1.2 below.

Chart 1.2

Queensland Government Capital Grants to
Local Government Authorities, by Purpose, 2008-09

FUNDING THE STATE CAPITAL PROGRAM

The State's capital program is implemented across both the General Government sector and the PNFC sector.

While the capital program undertaken across the PNFC sector contributes significantly towards meeting the Government's priorities, the process through which this capital program is developed and funded is different from the General Government sector.

Entities in the PNFC sector operate as commercial business entities, generally within competitive markets, and as such progress their capital programs on the basis of needs identified within the market sectors they service. There are a number of ways in which the capital expenditure program for the PNFC sector can be funded. These options include using cash flow from their business, borrowings, and, in certain situations, requesting a dividend reinvestment or equity injection from shareholding Ministers.

Table 1.2 outlines the major sources of funding for the State capital program.

In 2008-09, net borrowings and advances of \$10.904 billion are estimated in support of the capital program, of which \$2.897 billion is budgeted for the General Government sector. The expected borrowing and advances requirement of the PNFC sector for 2008-09 is \$8.007 billion. The major borrowers in this sector are Queensland Rail, the water bodies including Sunwater, and Queensland Motorways Limited.

In total, borrowings and advances are projected to fund around 66% of new infrastructure in 2008-09. Borrowing for capital purposes is consistent with the Government's fiscal principles outlined in the Government's *Charter of Social and Fiscal Responsibility* and is necessary to support expansion of the State's capital base.

After allowing for the reinvestment of earnings on the State's superannuation investments, free cash flow of \$4.682 billion is expected to be available for investment in capital in 2008-09.

2. STATE CAPITAL PROGRAM - PLANNING AND PRIORITIES

INTRODUCTION

The Queensland Government is committed to creating the infrastructure necessary to support the economic and social development of the State. It does so:

- by providing infrastructure in support of core service delivery priorities General Government sector investment
- through investments made by commercial entities of Government, including Government-owned corporations (GOCs) – Public Non-financial Corporations (PNFC) sector investment
- where appropriate, by fostering private sector investment

This chapter outlines key capital planning and expenditure priorities for the 2008-09 Budget.

Further details on the current status of projects with private sector involvement are provided in Chapter 3 of this Budget Paper.

CAPITAL PLANNING AND PRIORITIES

Capital investment decisions are predominantly driven by the policy priorities of Government and factors such as demographic changes and planning requirements which affect service delivery needs.

The Government has several mechanisms available to deliver the capital needed to support its priorities. These include funding and constructing its own infrastructure and providing capital grants to local government, the private sector and profit and not-for-profit organisations to build capital and provide services on behalf of the Government. The Government also examines private sector involvement in public infrastructure delivery either through joint ventures or stand alone projects.

During the planning and business case phase for each project, the Government carefully analyses which delivery option represents best value for money.

Investments made by the PNFC sector also contribute significantly to the State capital program. Entities in the PNFC sector operate on a commercial basis and, as such, their capital programs are developed on the basis of needs identified within the market sectors serviced by these entities.

There are a number of ways in which capital expenditure by the PNFC sector can be funded, including cash flows from the entities themselves, borrowings and, in certain circumstances, dividend reinvestment or equity injection from shareholding Ministers.

The method of financing utilised for capital investment by the PNFC sector is dependent upon the individual circumstances of the relevant entity and the specific nature of the project in question.

South East Queensland Infrastructure Plan and Program

The South East Queensland Infrastructure Plan and Program 2008-2026 (SEQ Infrastructure Plan) outlines the Government's infrastructure priorities to support the SEQ Regional Plan to 2026 and represents an unprecedented long term commitment to capital works in South East Queensland.

The SEQ Infrastructure Plan has undergone a major review to keep pace with the changing needs of the region.

The 2008 major review of the SEQ Infrastructure Plan involved a comprehensive analysis of the previous plan, project cost estimates, priorities and sequencing, integrating input from local government and industry, considering impacts on industry, and taking into account implications of other emerging issues.

The reviewed plan moves the infrastructure program into a stabilisation phase until 2026, providing long term security for industry to gear up to deliver a sustained expansion of project activity.

Highlights of the \$107 billion 2008-2026 SEQ Infrastructure Plan include:

- \$83.5 billion in road, rail and public transport projects
- \$8 billion in water infrastructure projects
- \$3.5 billion spending on energy networks (over five years)
- \$12 billion in social and community infrastructure

2008-09 HIGHLIGHTS

The Government is committed to continuing to develop Queensland's infrastructure base. Highlights of capital spending in 2008-09 are outlined in this section.

Water

The Government is continuing to address the unprecedented demand placed on water supplies as a result of a growing population and the worst drought on record in South East Queensland through the development of a range of major water infrastructure projects.

These projects will increase the supply of water and improve use of existing water resources to ensure a safe and sustainable water supply for the region well into the future.

The Government is also progressing a number of key regional water projects.

In 2008-09 the Government will invest over \$2.5 billion in water infrastructure across the state.

South East Queensland

The Government is constructing a water grid to connect water storages throughout South East Queensland, allowing water to be moved around the region to meet demand in the area of highest need. The 2008-09 capital works program includes \$217.4 million for continued construction of the Southern Regional Water Pipeline between Brisbane and the Gold Coast, due to be completed in 2008.

Funding of \$236.5 million is allocated in 2008-09 to complete corridor assessments surveys and a range of studies to support preliminary engineering design and construction works for the Northern and Eastern Pipeline Interconnectors.

In 2008-09, funding of \$531.8 million is allocated to progress the development of two dams in South East Queensland. The Wyaralong Dam on Teviot Brook, which is scheduled for completion in 2011, is the centrepiece of water storage initiatives on the Logan-Albert River catchment. The Wyaralong Dam and the Cedar Grove Weir will yield 21,000 megalitres per annum for South East Queensland. The first stage of the Traveston Crossing Dam on the Mary River, which is scheduled for completion in 2011, involves the construction of a 153,000 megalitre dam which will deliver up to 70,000 megalitres per annum.

The Western Corridor Recycled Water Scheme, the largest recycled water project in the southern hemisphere, is due for completion in 2008. The 2008-09 capital program includes funding of \$795 million for water treatment plants and 200 kilometres of pipeline.

Construction of the \$1.209 billion South East Queensland (Gold Coast) Desalination Plant at Tugun is due to be completed in 2008 and will deliver up to 125 megalitres per day. This project is currently a joint project between the State Government and the Gold Coast City Council. However, the State will purchase the Council's shares in the project by 30 June 2008 to acquire full ownership of the asset.

State-wide

Water security across the state remains a critical issue. The acquisition of land for future water infrastructure projects will continue with \$41.9 million allocated in 2008-09 for strategic land purchases relating to the Nathan and Connors River dams.

SunWater will progress feasibility investigations and prepare business cases for a number of key regional water projects identified in the Program of Works for the Statewide Water Grid. This work will include expenditure of \$31.8 million on feasibility investigations and the preparation of business cases for the Nathan Dam, Connors River Dam, Fitzroy Weir and Water for Bowen projects.

Transport and Roads Infrastructure

In 2008-09, capital funding of \$6.968 billion is provided for transport and roads infrastructure, including Queensland Transport, the Department of Main Roads, Airport Link, QR Limited, the port authorities, RoadTek and Queensland Motorways Limited.

Transport

Total capital outlays for the Transport portfolio in 2008-09 will be \$3.653 billion, representing a 47% increase in capital expenditure compared with the 2007-08 Budget. This includes \$700 million for Queensland Transport.

Highlights of the 2008-09 Queensland Transport capital program include:

- \$204.5 million towards construction of the Northern Busway between the Royal Children's Hospital and Kedron
- \$60.3 million towards construction of an Eastern Busway corridor connection from the Eleanor Schonell Bridge to Ipswich Road with stations at Park Road and the Princess Alexandra Hospital
- \$50 million towards construction of the Eastern Busway: Princess Alexandra Hospital to Buranda. Construction will include an elevated busway station within the Princess Alexandra Hospital and will be a key link in the regional busway network
- \$33.7 million towards the construction of cycle links to enhance the cycle network in South East Queensland. This funding comprises \$10.3 million towards the construction of state-owned cycle links and \$23.4 million in grants to local authorities

Rail and Ports

In the last 12 years, the nature of the transport industry has fundamentally changed. Competitive reforms have been introduced and a nationally integrated transport market is emerging. This has had the effect of combining all transport modes (road, rail and ports) to improve efficiencies in transport logistics.

An efficient, integrated transport process maximises the efficiency of the flow of goods, increases returns to the State and makes importers and exporters more competitive in an increasingly competitive global market.

Exports are a key driver for the Queensland economy with coal being the single most important mineral commodity exported. Coal exports to Queensland's largest trading partners are continuing to increase with strong economic growth in China and India resulting in significant growth in demand from the coal-reliant steel and electricity production sectors.

In the past decade, Queensland, as the supplier of almost 58% of Australia's coal exports, has increased the volume of its coal exports by 50% and its value by 76%. This strong demand is forecast to continue with Queensland's coal exports predicted to grow by approximately 42% by 2010 and a further 40% by 2015.

In response to these coal demand forecasts, in February 2008 the Queensland Government launched a \$5.4 billion Coal Transport Infrastructure Investment Program (the Program) which involves significant investment in government owned rail and port infrastructure as well as major investments by private coal terminal operators.

The Program, outlined in the document *Queensland coal transport – planning for growth*, sets out Queensland's current port and rail capacities, likely expansions by 2015 and possible expansions by 2020 where demand warrants. Port expansions could provide export capacity of over 300 million tonnes per annum (mtpa) by 2015 and over 400 mtpa by 2020. Rail expansions could provide similar additional capacity.

In particular, QR Limited, the Ports Corporation of Queensland Limited and Gladstone Ports Corporation are investing in coal-related infrastructure that will ensure that the capacity of the export supply chain is maximised. Funding is also being provided for major investments in port infrastructure to meet expected demand for other Queensland export and import trades.

Major rail and port capacity expansions currently in an advanced stage of planning include the Wiggins Island Coal Terminal, the Surat Basin Rail Project, Blackwater rail upgrade, the Abbot Point Coal Terminal expansion (works are underway) and the Goonyella to Abbot Point Expansion project (including the Northern Missing Link).

In addition to bulk commodity and containerised trade facilitated by rail and seaports, Queensland Transport GOCs also deliver services in passenger rail. Significant investment in both track infrastructure and rollingstock for Citytrain services is being undertaken in 2008-09.

Continued growth in the low-cost carriers segment of the Australian aviation industry has resulted in sustained growth in domestic passenger numbers through key Queensland airports, driving the need for investment.

Highlights of the 2008-09 rail and ports capital program include:

- **coal network** \$576.4 million will be spent on additional track works on the coal network in Central Queensland. Specific projects include the Goonyella to Abbot Point (GAP) expansion project which includes the Northern Missing Link (subject to approvals) and the Jilalan Rail Yard Upgrade. This expenditure will allow for additional coal haulage capacity on the network. A further \$303.7 million will be spent on new and upgraded coal rollingstock, including additional electric and diesel electric locomotives and coal wagons, to support the increased haulage of coal in Central Queensland.
- Citytrain track infrastructure upgrades \$565.4 million to extend the Citytrain track network and track upgrades (including Springfield and Robina to Varsity Lakes rail lines, Corinda to Darra third track, Caboolture to Beerburrum duplication).
- **Citytrain rollingstock** \$132.2 million for additional rollingstock for Citytrain service enhancements.
- **Cairns airport** \$67.1 million for redevelopment of the Domestic Terminal Building.
- **Abbot Point coal terminal** \$70 million to increase the capacity of Abbot Point to 25 million tonnes (mt). A further \$250 million will be spent on the Abbot Point X50 Expansion, which will increase capacity to 50 mt.
- Gladstone port \$18.3 million of ongoing works at the RG Tanna Coal Terminal, \$4.3 million for air quality initiatives and \$5 million on detailed engineering and commercial feasibility investigations for the proposed Wiggins Island Coal Terminal.
- **Port of Brisbane** \$23.5 million on construction of berth and wharf 11 and 12 at Fisherman Islands to accommodate increasing trade throughput and \$29.4 million on completing the general purpose berth. To ensure all weather access to the Port of Bundaberg, \$6 million will be spent on the construction of a bridge across the Burnett River.
- **Port of Townsville** \$19.8 million for the acquisition of infrastructure and port improvements during 2008-09.
- **Mackay port** \$4.7 million to build a storage and distribution facility for the importation of fertiliser.

Roads

In 2008-09, capital funding of \$3.235 billion is provided through the Main Roads portfolio. Highlights of the 2008-09 roads capital program include:

- \$537.6 million to construct a second Gateway Bridge crossing and to increase capacity on the Gateway Motorway, between Mt Gravatt-Capalaba Road and Nudgee Road, at a total estimated cost of \$1.883 billion.
- \$150 million towards construction of the new Houghton Highway Bridge between Brighton and Redcliffe, at a total estimated cost of \$315 million.
- \$200 million towards the federally-funded Ipswich Motorway upgrade between Wacol and Darra, \$100 million to complete the upgrade of the Ipswich/Logan Motorway interchange and \$20 million for planning and land acquisitions for the upgrade of the Ipswich Motorway to six lanes between Dinmore and Goodna.
- \$24 million in federal funding to widen the Bruce Highway in Gympie to four lanes between Kidgell Street and Pine Street, at a total estimated cost of \$70.8 million.
- \$50 million to improve flood immunity on the federally-funded Bruce Highway between Corduroy Creek and Tully High School, at a total estimated cost of \$172.4 million.
- \$42.3 million towards Stages 2 and 3 of the Townsville Ring Road, at a total estimated cost of \$119.2 million (\$39.8 million State; \$79.5 million Australian Government).
- \$34.5 million towards construction of the Bundaberg Ring Road, at a total estimated cost of \$92 million. The Ring Road will provide an alternative route from the Isis Highway to the industrial area and the port to the east of Bundaberg City and ease congestion.

Energy

Queensland's annual electricity consumption over the last three years averaged approximately 50,600 GWh. Electricity consumption in Queensland is expected to grow at an annual average of 3.9% over the next three years to 2010-11 in accordance with the medium economic growth (50% Probability of Exceedance) projection of the 2007 Statement of Opportunities of the National Electricity Market Management Company.

This growth is driven to a large extent by the resources boom and an increase in population, economic activity and use of air-conditioners. The growth in energy consumption has been more significant in South East Queensland, due to the concentration of population and industry.

The 2007 Powerlink Annual Planning Report indicates that the south east region had an average annual population growth of 4.6% over the last three years and it is expected that the forecast energy consumption will grow by an average of 4.4% over the next three years to 2010-11.

Investment in electricity infrastructure continues to be driven by peak demand. While demand management strategies are being explored as medium to long term responses, significant capital investment in the electricity sector is required to ensure the sector continues to meet demand. The Government's ongoing commitment to the findings and recommendations of the Electricity Distribution and Service Delivery review is also a key driver of the electricity capital expenditure program.

No new generation investment by State-owned generators is planned for 2008-09 as existing capacity will meet reliability and demand requirements, particularly with the recently commissioned state-of-the-art Kogan Creek Power Station adding another 750 megawatts of generation capacity.

The private sector continues to make significant investment in generation capacity in the state. An additional 1,516 megawatts of capacity will be added to the state's electricity supply over the 2009-10 period as gas-fired plants currently being developed at Mt Stuart, Braemer, Darling Downs, Condamine and Yarwun are progressively commissioned.

Powerlink will invest \$675.4 million on new transmission infrastructure and augmentation, while ENERGEX and Ergon Energy will similarly invest a total of \$1.916 billion on the distribution networks to maintain reliable and secure transmission and distribution electricity networks across the state. The forecast network expenditure has been recognised by both the Australian Energy Regulator and the Queensland Competition Authority in their current regulatory determinations.

Altogether, a total of \$2.971 billion has been budgeted to be spent in 2008-09 by the Government owned electricity corporations on plant and network overhauls, maintenance and augmentation. This will ensure that the State's electricity assets and infrastructure continue to maintain secure and reliable supply and are well positioned to meet forecast growth in demand.

Highlights of the 2008-09 electricity capital program include:

• **generation sector**: the primary focus will be capital works to ensure ongoing generation plant reliability and efficiency. CS Energy will spend \$110 million on improvements to the Callide power station, including overhauls and major refurbishment work on the B station mid-life refit and \$59.8 million on improvements to the Swanbank power station. Stanwell will spend \$61.6 million on comprehensive maintenance works and plant upgrades of Stanwell, Barron Gorge and Kareeya power stations.

Similarly, Tarong Energy will spend \$118.1 million on maintenance and improvements at the Wivenhoe, Tarong and Tarong North power stations. Tarong Energy will also spend \$86.1 million on the Kunioon coal mine to provide a secure future source of fuel for Tarong and Tarong North power stations.

- **transmission sector**: Powerlink will undertake major transmission augmentation and new capital works of \$675.4 million to reinforce electricity supply and maintain a secure and reliable transmission network across the state.
- **distribution sector**: ENERGEX and Ergon energy have budgeted network and non-system capital expenditure of \$911.1 million and \$1.004 billion respectively for the augmentation and maintenance of the distribution network and to improve the security and reliability of electricity supply in their respective regions.

Health

In 2008-09, the Government continues its significant investment in health infrastructure with a \$1.024 billion capital program. The focus for 2008-09 includes investment in new hospitals, hospital redevelopments, demand management, staff accommodation and the development of Community Health Centre infrastructure.

The program includes the redevelopment of the Cairns, Mackay and Mt Isa Hospitals, which are to be funded through the recently announced airport sales. The capital program also includes SEQ Infrastructure Plan projects such as the Gold Coast University Hospital, Sunshine Coast Hospital, Queensland Children's Hospital, additional bed capacity in the Sunshine Coast Health Services District, Robina Hospital expansion and North Lakes Health Precinct.

Housing

In 2008-09, \$125 million from the Queensland Future Growth Fund will boost the \$516.9 million capital program for the Department of Housing. This investment will assist to address the growing need for affordable and appropriate accommodation and to realign the mix of dwellings to provide a better match to client needs.

This will bring the value of Queensland's social housing asset base to approximately \$12.4 billion.

A range of other initiatives totalling \$53.4 million will be progressed to respond to housing needs of people who require particular assistance. The funds include providing appropriate housing responses to people being discharged from the Spinal Injuries Unit of the Princess Alexandra Hospital, people with mental illness, homeless people and Indigenous people living in regional and remote locations.

Education and Training

The education capital works program will total \$532 million (including an expense component of \$82.9 million) and \$190 million (\$48 million of which is expensed) invested in vocational education and training capital initiatives.

Almost half of the education capital works budget will be used to provide facilities for population growth areas across the state. A total of \$234.9 million will be spent on construction of new schools, further staged work at existing schools, acquisition of land and provision of additional classrooms and toilets.

The Government's \$1 billion *Tomorrow's Schools* initiative, to deliver new and renewed facilities that support modern teaching methods in older schools, will continue with \$150 million invested during 2008-09. In addition, \$111.2 million will be used to replace and enhance learning facilities in existing schools across the state.

2008-09 is the third year of the implementation of the *Queensland Skills Plan*, which included a six-year infrastructure program worth over \$300 million. The Budget provides \$120 million (including an expense component of \$22 million) for the construction and refurbishment of TAFE training facilities, including \$30.6 million for continuing the SkillsTech Australia Acacia Ridge campus and \$24.1 million for planning and construction of SkillsTech campuses at Townsville and Mackay. This capital works program is supported by investment of over \$41 million in ICT and other training equipment.

The Government continues to investigate non-traditional arrangements for the delivery of education and training capital works. A public-private partnership arrangement has been utilised to deliver the South Brisbane campus of the Southbank Institute of Technology and Government is examining a similar approach to deliver a package of seven new schools in South East Queensland.

QUEENSLAND FUTURE GROWTH FUND

The Queensland Future Growth Corporation was created as a corporation sole under the *Future Growth Fund Act 2006* to administer the Queensland Future Growth Fund. The Queensland Future Growth Fund was established by investing the proceeds from the sale of Sun Retail, Sun Gas, Powerdirect Australia and the Allgas network which amounted to over \$3 billion.

The funds will be used to secure the state's future economic growth and the state's environmental sustainability through a range of new infrastructure projects.

Recent achievements

- Collected and invested the remaining proceeds from the sale of ENERGEX's electricity and gas retail businesses, the Allgas distribution network and the competitive elements of Ergon Energy's electricity retail business, including Ergon Energy's subsidiary, Powerdirect.
- Allocated \$315.2 million towards transport infrastructure, social housing stock, clean coal technology and the Innovation Building Fund.

Future developments

Over the coming years, the Fund will continue to deliver the following key priorities:

- constructing and accelerating vital infrastructure projects in the areas of transport and roads, with \$177 million forecast to be allocated from the Fund in 2008-09
- water projects are forecast to receive \$567.4 million from the Fund during 2008-09
- funding for clean coal technology that will make a proactive and positive contribution to the science and technology of reducing greenhouse gas emissions
- funding for the Renewable Energy Fund and the Queensland Smart Energy Savings Fund to combat the effects of climate change
- contributing towards the Innovation Building Fund to capitalise on previous investment in research and development infrastructure and to further develop in areas of comparative advantage
- supporting commercial infrastructure with details on projects to be determined by future priorities and commercial negotiations and
- continuing to fund the Department of Housing for a major expansion of the State's social housing stock.

Proceeds from sales of the Mackay, Cairns and Brisbane Airports will be transferred to the Queensland Future Growth Fund for allocation to the redevelopment of the Mackay, Cairns and Mt Isa Base Hospitals.

The fund will also benefit from interest earnings on the Fund balance.

Table 2.1 shows the allocation of the Fund towards various projects.

| Table 2.1 Queensland Future Growth Fund Projects ¹ | | | | | | | | |
|---|-----------------------------------|---------------------------------|------------------------------------|-----------------------------------|--|--|--|--|
| | Total allocation \$ million | 2007-08 Budget \$ million | 2007-08 Est. Act. \$ million | 2008-09 Estimate \$ million | | | | |
| Transport infrastructure | 500.0 | 156.0 | 151.2 | 177.0 | | | | |
| Water infrastructure ² | 1,000.0 | | | 567.4 | | | | |
| Clean coal technology | 300.0 | 56.8 | 66.8 | 19.4 | | | | |
| Climate change projects ³ | 100.0 | 20.0 | | 32.0 | | | | |
| Smart State projects | 100.0 | 15.0 | 12.2 | 20.0 | | | | |
| Commercial infrastructure including Government-owned corporations | 600.0 | | | 50.0 ⁴ | | | | |
| Social housing stock | 500.0 | 85.0 | 85.0 | 125.0 | | | | |
| Total | 3,100.0 | 332.8 | 315.2 | 990.8 | | | | |

Notes:

- The redevelopment of the Mackay, Cairns and Mt Isa Base hospitals will be reflected following the finalisation of the airport sales in Mackay and Cairns and the Government's stake in the Brisbane Airport Corporation Limited.
- The 2008-09 Estimate reflects the provision of funding to the South East Queensland bulk water entities.
- 3. The Renewable Energy Fund and the Queensland Smart Energy Savings Fund were established during 2007-08 however funding will not be required from the Fund until 2008-09.
- 4. This funding represents the 2008-09 component of a \$100 million funding package to be provided to the Abbott Point Coal Terminal expansion.

3. PRIVATE SECTOR CONTRIBUTION TO THE DELIVERY OF PUBLIC INFRASTRUCTURE

INTRODUCTION

The Government believes that private sector participation in the provision of public infrastructure can assist the timely delivery of efficient and effective infrastructure to the Queensland community.

Currently, the Government is considering several infrastructure projects to be explored as potential Public Private Partnerships (PPP) under its Value for Money Framework. In addition to those projects being assessed under the Framework, other major infrastructure projects with private sector involvement are also being progressed through partnering with the private sector as well as via more traditional delivery methods.

The Supported Debt Model

The Government is currently progressing the South East Queensland Schools Project, utilising the Supported Debt Model (SDM).

The Supported Debt Model is a financing variant of the 100% privately financed PPP Model which seeks to deliver a better value for money solution for the State. Under the SDM, Queensland Treasury Corporation will provide the notionally risk free portion of the Project's financing requirements during a project's operations phase, in the form of first ranked senior debt.

The rationale behind the SDM is that, once the construction phase has been completed, the project risk exposure reduces significantly and the probability of any senior debt not being repaid in the event of termination (including for contractor default) is relatively low. Therefore, a certain portion of the total senior debt (the supported debt element) can be assessed as notionally risk free and thus benefits from a risk free borrowing rate; that is, the Queensland Government's cost of funds.

CURRENT PROJECTS

Toowoomba Bypass

The Queensland Government has recently completed a business case development Study for the Toowoomba Bypass project under the Value for Money Framework, with the assistance of the Australian Government. The Queensland Government is currently in discussion with the Australian Government in regards to its funding commitment for the project. The proposed bypass will provide a safer and faster range crossing, removing the majority of heavy vehicles from city streets and the existing range road.

Southbank Education and Training Precinct Project

Queensland's first PPP, which in 2007 was awarded 'Best Global Project' by the international Public Private Finance Awards, is due for completion in late 2008. The project involves construction of 11 new buildings and renovation of another four buildings on the South Bank campus.

Gold Coast Rapid Transit Project

A quality public transport system from Helensvale to Broadbeach and through to Coolangatta is identified in the SEQ Infrastructure Plan. The Government is currently developing a business case under the Value for Money Framework for stage one of this project (Helensvale to Broadbeach).

This business case will consider several transport modes including Light Rail Transit and Bus Rapid Transit, as well as the project delivery option best suited to achieving a value for money outcome for the state by optimising the allocation of construction, operation, maintenance and financing risks. The business case is expected to be completed by mid 2008.

South East Queensland Schools

The Government has announced that it will deliver up to seven new schools in South East Queensland through a PPP, utilising the SDM financing variant on the traditional 100% privately financed PPP. The SDM uses public sector debt for the risk free portion of the financing requirement during the low risk operational phase of the Project.

Following an expressions of interest process, the Government has requested binding bids for the partial financing, master planning, design, construction, maintenance and provision of specified facilities management services for the new schools for a concession period expected to be approximately 30 years. At the end of the concession period, the leasing arrangements would expire and the schools revert to the State. It is anticipated that construction of the schools will commence in 2009, with the first of the schools ready for use by the start of the 2010 school year.

Sunshine Coast Hospital

The Government is currently undertaking market sounding for a proposed 650 bed tertiary hospital at Kawana on the Sunshine Coast, which is planned to be operational by 2014. The hospital is being developed under the Value for Money Framework and the Government considers that there is potential for the project to be delivered as a PPP. A detailed business case will be developed in 2008, following the outcomes of a market sounding process.

Airport Link and Northern Busway

In October 2006, the Government approved the business cases for the Airport Link and Northern Busway projects, and approved the joint procurement of the Airport Link as a PPP and the Northern Busway (Windsor to Kedron) via traditional delivery.

The Airport Link is proposed to be a mainly underground toll road that connects the North South Bypass Tunnel, Inner City Bypass and local road network at Bowen Hills to the northern arterials of Gympie Road and Stafford Road at Kedron and Sandgate Road and the East-West Arterial in the north-east. The Northern Busway is a two-lane, two-way dedicated busway proposed to connect the existing Inner Northern Busway with the Royal Children's Hospital at Herston to Bracken Ridge.

Following a competitive process, BrisConnections, a consortium of Macquarie Capital Group, Thiess and John Holland, was announced as preferred bidder for the project on 19 May 2008. Construction of the projects will commence in 2008-09 and it is anticipated that the projects will be operational in 2012.

Gateway Upgrade Project

The Gateway Upgrade Project involves the duplication of the Gateway Bridge and the upgrade of 20 kilometres of the Gateway Motorway from Mount Gravatt-Capalaba Road to Nudgee Road. The project is being delivered by Queensland Motorways Limited under a design, construct and maintain contract (including a 10 year maintenance period) in a partnership agreement between the Department of Main Roads and the Leighton Abigroup Joint Venture.

The project is progressing according to schedule and budget, with sections of the upgrade to be opened progressively to traffic. The new section of the upgrade for southbound traffic from Port of Brisbane Motorway to Wynnum Road is now open, with the new bridge scheduled to be open by late 2010.

State Tennis Centre - Tennyson Riverside Development

Following a competitive bidding process, the Government selected Mirvac as the preferred developer for the delivery of an international standard State Tennis Centre and residential development at Tennyson.

Situated in one of Brisbane's most scenic locations, the development will include a state-of-the-art tennis and residential complex which integrates with the surrounding area.

The State Tennis Centre is estimated to cost \$82 million. It is on schedule to be completed in time for the staging of the Brisbane International Tennis Championship in January 2009 and will be managed by Stadiums Queensland.

North Bank

The Government has announced an Enquiry by Design process to bring together a range of professionals in design and construction, as well as stakeholders, to adopt a consultative and creative approach to the North Bank project. The consultation with professional and stakeholder representatives will help determine an acceptable development of North Bank that will enhance public space and improve community facilities in the stretch of the Brisbane central business district waterfront. The aim of the North Bank project is to complement the existing South Bank development, further enhance Brisbane's reputation as the 'River City' and deliver the outcome at no cost to the Government.

Whitsunday Region Airport

The Government is undertaking a competitive process to improve both domestic and international air access to the Whitsunday region. The Government has sought Expressions of Interest for infrastructure upgrades and operational improvements to deliver improved domestic air services and international air charter access at either the existing Whitsunday Coast Airport or the Laguna Whitsunday Airport.

A number of interested parties submitted Expressions of Interest in November 2007, and in March 2008 the Government announced a shortlist of bidders that will be invited to participate in the Binding Bid stage of the competitive process.

Urangan Boat Harbour

The Urangan boat harbour is the principal marine infrastructure for the Hervey Bay region. In response to growing demand in this area, the Government commenced a competitive bidding process to facilitate the development and expansion of the harbour precinct at no cost to the State. In May 2008, Watpac Seymour Joint Venture was selected as the preferred proponent for the development of the Urangan boat harbour precinct.

Gold Coast Marine Development Project

In September 2007, the Government commenced a two stage competitive process for the Gold Coast Marine Development Project. The project consists of two separate Expression of Interest processes for two parcels of state land on the Gold Coast Spit.

The vision for the project includes:

- a marina for super yachts, recreational and fishing vessels on the western side of The Spit
- a tourism development on two parcels of crown land south of Sea World
- the incorporation of an Aboriginal cultural centre and recognition of indigenous culture into the tourism experience on the Gold Coast

- improved public recreational facilities in Doug Jennings Park and surrounding areas on The Spit
- a protection and enhancement program for the 93 hectare Federation Walk and Nature Reserve areas east of Sea World Drive.

Expressions of Interest were received in November 2007. It is anticipated that preferred bidders for the two parcels will be selected in early 2009, with commencement of construction scheduled for late 2010.

Surat Basin Railway

In December 2006, the Government granted a Conditional Exclusive Mandate under its Value for Money Framework guidelines to a joint venture consortium to investigate the development of the Surat Basin Railway. The proposed project would link the towns of Wandoan and Banana to the Port of Gladstone and would assist in the development of the Surat Basin coalfields.

The consortium, comprising Australian Tourism Export Council, Industry Funds Management, QR Limited, Xstrata and Anglo Coal, has completed the initial stage of its investigations, including the identification of a preliminary rail corridor, and is currently preparing a draft Environmental Impact Statement that will be available for public comment towards the end of 2008. Subject to meeting the conditions of the Exclusive Mandate, it is expected that financial close for the development of the railway will be achieved by 2009-10.

Aurukun Project

The Aurukun Bauxite Resource is situated in a parcel of land in western Cape York, south of Weipa. As part of an international competitive bidding process for the granting of development rights over the Aurukun Bauxite Resource, the Government selected the Aluminium Corporation of China Limited (CHALCO) to develop the Aurukun Project, including a mine and wash plant at Aurukun and an alumina refinery on the east coast of Queensland, at an estimated cost of \$2.933 billion. The Government is seeking to optimise the economic, social and financial outcomes from the development of the bauxite resource and investment in downstream processing.

An Indigenous Land Use Agreement between the traditional owners of Aurukun land, CHALCO and the Government has been entered into, allowing CHALCO to commence its feasibility study for the Aurukun Project. The Government has awarded the Aurukun Project Significant Project Status and CHALCO has commenced work on an Environmental Impact Statement for development of the mine at Aurukun.

Townsville Ocean Terminal

The Townsville Ocean Terminal is a key component in the implementation of the Queensland Cruise Shipping Plan and supports the potential economic benefits to Queensland and the Townsville region in particular, associated with the increased visits from both cruise vessels and Australian and foreign military vessels on rest and recreation visits.

Under a Development Agreement between the Government and developer, the project will provide Townsville with:

- a dedicated cruise terminal and wharf to attract cruise ships and naval vessels, located on the Western Breakwater, adjacent to the Port of Townsville
- an integrated residential and tourism development for the land surrounding the casino
- a landscaped residential development, providing public access to the Breakwater and future green areas.

It is anticipated that construction of the terminal will commence in early 2009 and be completed by the end of 2010.

OTHER PRIVATE SECTOR INVESTMENT

There is significant private sector participation in the state's energy sector, with the private sector currently owning 42.3% of total generation capacity, which will increase to 48.6% with the commissioning of five new gas-fired plants currently under construction. The private sector also has 50% interest in the Callide C and Tarong North power stations. CS Energy has also been involved in facilitating the development of gas sources through farm-in arrangements with private sector gas companies in the Surat basin and in northern New South Wales.

Queensland's ports also have a number of projects involving private sector investment. The Port of Brisbane Corporation Limited will invest \$536.6 million over five years in constructing new wharves 11 and 12 and establishing associated land works at Fisherman Islands. Hutchison Port Holdings Limited has entered into an agreement to lease the new container wharves and will become the third stevedore operating in Brisbane.

4. CAPITAL OUTLAYS BY ENTITY

DEPARTMENT OF CHILD SAFETY

The 2008-09 Budget provides for \$32.8 million in capital expenditure for the Department of Child Safety. The capital program includes the establishment of residential care facilities, investment to enhance indigenous service delivery, ongoing investment in the Integrated Client Management Information System (ICMS), and progression of office accommodation solutions to meet service delivery requirements.

Program Highlights

- \$4.1 million in 2008-09 to continue the establishment of safe houses in the Indigenous communities of Pormpuraaw, Kowanyama, Aurukun, Weipa/Napranum, Doomadgee, Yarrabah and Palm Island. Additional funding of \$6.6 million over two years will also enable development of facilities to service the Indigenous Communities of Eastern Cape York, Torres Strait, Northern Peninsula Area (Bamaga, Seisia, New Mapoon, Umagico and Injinoo) and Mornington Island. The facilities provide a safe place for Indigenous children and young people to be housed during initial assessments and longer term residential care, allowing children to remain within their own communities.
- \$8.4 million in 2008-09 will be spent on residential care facilities. This includes increased funding of \$5.8 million in 2008-09 (\$26.4 million over four years) to establish an additional 12 residential care facilities. These facilities will expand the range of placement options available for children and young people.
- \$5.6 million in 2008-09 will progress the establishment of therapeutic residential facilities in Cairns, Townsville and South East Queensland. These facilities will extend the department's capacity to respond to children with complex behaviours and mental health issues, by providing intensive support services.
- \$5.9 million in 2008-09 (\$14.1 million over four years) will support ongoing investment in ICMS and related information management systems.
- \$6.2 million will be invested in 2008-09 to progress office accommodation initiatives to support departmental staff located across the state.

COMMUNITIES

Program Highlights

The department's capital expenditure program for 2008-09, including capital grants, is \$113.3 million. This investment will continue to foster strong communities where all people are safe, valued and empowered, wherever they live, whatever their circumstances. These capital funds are being applied towards a range of strategies including:

- Refurbish decommissioned preschools into early childhood education and care services at Mackay, Beenleigh, Nerang, Toowoomba, Ayr and Beaudesert from a total budget of \$15 million.
- Early years centres at Browns Plains and Cairns, with Nerang and Caboolture scheduled for completion in 2008-09. The early years centres will provide high quality universal early childhood education, health and child care services, with some targeted services for vulnerable families from a total budget of \$12.1 million.
- \$8.5 million allocated in 2008-09 for capital grants as part of the early years Best Start Strategy.
- \$2 million allocated in 2008-09 to continue the commitment to the improvement of youth justice services infrastructure development including youth justice conferencing; youth support services and enhanced program delivery.
- \$11.4 million is allocated to commence capital works for additional youth detention centre capacity in North Queensland, commencing operation in 2011-12.
- Improve learning and development areas, physical security and accommodation at the Cleveland Youth Detention Centre in Townsville at a projected cost of \$14.7 million over three years.
- \$15.3 million allocated in 2008-09 to complete the Brisbane Youth Detention Centre refurbishment and enhancement project.
- \$3.6 million to complete the construction of neighbourhood centres at Innisfail, Charters Towers, Marlin Coast and Maleny.
- \$1 million capital grant as a contribution to the replacement of the Hervey Bay Neighbourhood Centre.
- \$1.5 million allocated in 2008-09 to complete two multi tenant service centres in Toowoomba and Caboolture, with work being undertaken to refurbish a recently acquired site at Mackay from a total budget allocation of \$4.1 million.

- \$3 million allocated in 2008-09 for community and neighbourhood centre upgrades, which includes disability access, air-conditioning and safety issues.
- \$6.4 million allocated in 2008-09 for the refurbishment of retail stores at Lockhart River and Palm Island, fuel facilities at Kowanyama and the procurement of plant and equipment.
- \$5.1 million in capital funding over three years for the establishment of safe havens in Cherbourg and Mornington Island.
- \$4 million allocated in 2008-09 to Smart Service Queensland initiatives to continue the development of key whole-of-Government systems across multiple agencies, and standardise and streamline Queensland Government services to enhance access and service delivery to the community.
- \$5.4 million allocated in 2008-09 for information communication technology equipment for Shared Information Solutions.
- \$2.9 million allocated in 2008-09 for the development of a new grants management system.
- \$8.6 million allocated in 2008-09 to further the development of the Information Renewal Initiative, primarily the Integrated Client Management System.
- \$2.5 million allocated in 2008-09 to capital upgrades at the Southern Outlook in Boonah (total funding of \$4.9 million over two years). The Southern Outlook is the main headquarters and location for delivering programs for at risk youth.
- \$4.3 million allocated in 2008-09 towards capital upgrades at the Brisbane Children's Court.

CORRECTIVE SERVICES

The agency's capital expenditure program for 2008-09 is \$400.5 million and principally comprises the expansion of prison infrastructure to meet the immediate and short-term accommodation needs of prisoners, and upgrades to existing prison infrastructure. These initiatives link to the Government's outcome of protecting our children and enhancing community safety.

- \$118.3 million is provided in 2008-09 to commence an expansion and upgrade at the Lotus Glen Correctional Centre.
- \$196.7 million is provided in 2008-09 for the first stage of the development of the South East Queensland Correctional Centre at Gatton, comprising a women's centre and central infrastructure.
- \$37.3 million is provided in 2008-09 to complete the expansion of the male Townsville Correctional Centre, \$12.0 million to complete the new women's correctional centre at Townsville, \$7.3 million to complete the redevelopment of the Sir David Longland Correctional Centre as Brisbane Correctional Centre, and \$5.7 million to complete the expansion of the Arthur Gorrie Correctional Centre.
- Upgrades to existing prison infrastructure will continue, including \$9.0 million towards the five-year \$40 million perimeter security systems upgrade.

DISABILITY SERVICES QUEENSLAND

Investment in capital infrastructure forms a vital part of delivering specialist disability services. As a human services provider and funder, Disability Services Queensland invests in capital infrastructure in cases where it is required for Government service provision. Capital infrastructure is also utilised to accommodate and support departmental staff, tailored accommodation infrastructure for people with an intellectual disability and respite centres. The major portion of non-Government service delivery utilises existing community sector capital infrastructure.

Program Highlights

The department's total capital expenditure for 2008-09 is \$71.7 million.

The 2008-09 Budget commits \$52.1 million to capital works, equipment purchases and software development, of which \$2 million is new capital funding to enhance disability services delivered within the Government and non-Government sectors.

- Continue with a capital upgrade program for the department's properties with a 2008-09 budget of \$20.7 million. Underperforming assets will be upgraded to improve support in service provision, particularly residential and respite accommodation and new office accommodation.
- Complete the progress of the tailored accommodation for purpose designed cluster housing infrastructure for people with an intellectual disability at \$6.7 million and respite service replacement projects in the amount of \$0.5 million.
- Commit \$6.8 million in 2008-09 to design and construct purpose-built accommodation as part of a targeted response for people with severely challenging behaviours, with total project funding being \$24.3 million commencing in 2007-08 over four years.
- \$6.2 million for enhancements to the Disability Services Queensland Information System to support disability service system reform, with total project funding being \$37.5 million over four years.
- Complete innovative and tailored housing projects at Maryborough and Toowoomba at a cost of \$2.4 million.
- \$0.6 million to complete refurbishments to the former Gladstone South decommissioned preschool for the use of non-Government service providers to deliver services.

In addition, \$19.6 million has been committed to capital grants, including:

- \$3.7 million in capital grants to develop all abilities playgrounds in partnership with local councils which will provide safe and enjoyable recreational equipment and activities for all children including those with a disability.
- \$2.5 million for the non-Government sector to reduce the number of younger people with a disability living in or at risk of entering residential aged care.
- \$4.4 million in capital grants to purchase and construct specialist cluster housing for people with an intellectual disability and high and complex physical support needs.
- \$6.8 million in capital grants to the non-Government mental health sector.
- \$2.2 million in various capital grants for the non-Government disability service sector.

EDUCATION, TRAINING AND THE ARTS

Total capital expenditure for the Department of Education, Training and the Arts portfolio (including related entities) for 2008-09 is \$929.7 million. This significant investment will help to create a sustainable organisation that continues to improve outcomes for Queenslanders.

Education

The 2008-09 Budget provides a substantial investment in educational facilities with an education capital works program of \$532.0 million (including an expense component of \$82.9 million).

Education's planning for capital meets the Government's priorities and needs by considering population growth and shifts and the consequential impacts on enrolments, changes to educational standards and educational delivery methods, meeting school renewal requirements, and addressing high priority needs such as student and staff health and safety.

Program Highlights

- \$234.9 million to construct four new schools: one in outer northern Brisbane; three on the Gold Coast; including two in Ormeau; and one in Oxenford, undertake further staged work at nine schools, make land acquisitions and provide additional classrooms and toilets in growth areas of the State.
- \$111.2 million to replace and enhance learning facilities at existing schools.
- \$150 million to continue the \$1 billion Tomorrow's Schools Program.
- \$15.5 million to acquire new employee housing and refurbish existing housing stock.

Training

The Training portfolio's capital expenditure program for 2008-09 is \$190 million (including an expense component of \$48 million), of which \$120 million (including an expense component of \$22 million) is for the construction and refurbishment of TAFE training facilities. The implementation of the Queensland Skills Plan is continuing into the third year of a six year major capital works program. This program is supported by a five year information and communication technology (ICT) modernisation program to leverage improvements in efficiency, productivity and increased training output.

Program Highlights

- \$37.4 million is to be invested directly in ICT, while a further \$5 million will be invested in training equipment.
- \$30.6 million for continuing the SkillsTech Australia major trade and technician skills campus at Acacia Ridge in Brisbane.
- \$24.1 million will be used to continue detailed planning and construction of the SkillsTech Australia major trade and technician skills campuses in Townsville and Mackay.
- \$12 million for construction of the Gold Coast Institute of TAFE's Coomera Education Precinct for creative industries.
- \$6.5 million for the first phase of works to redevelop the Cairns campus of the Tropical North Institute of TAFE.

Arts

Arts Queensland will continue its delivery of key arts and cultural infrastructure for Queensland, through a capital works program totalling around \$41.2 million in 2008-09.

Program Highlights

- Continue the \$34 million, 2007-09 program to improve disability access at the Queensland Performing Arts Centre (QPAC) and refurbish the Lyric Theatre, Concert Hall and public spaces at QPAC.
- Continue the \$7.9 million, two-year allocation to transform the Cultural Centre auditorium into a creative ideas and technology centre, The Edge, for young people aged 14 to 25.

Australian Agricultural College Corporation

With a capital budget of \$2.8 million in 2008-09, the Australian Agricultural College Corporation is continuing its development of a best practice agricultural training platform by aiming for world class facilities at farm scale across representative farming systems.

Library Board of Queensland

The State Library will continue to invest in collection assets for its General Reference and Heritage Collections. The 2008-09 year will see the purchase of new software to provide enhanced access to our collections, the upgrading of existing software that manages our digital collections and the continuation of the State Library's ongoing plant and equipment replacement program to ensure maximum benefit is achieved from its capital investment.

Queensland Art Gallery

The Gallery's \$2.1 million property, plant and equipment expenditure program for 2008-09 will provide for purchases of works of art and operational plant and equipment.

Queensland Museum

Queensland Museum's 2008-09 capital program of \$2.1 million will fund enhanced visitor experiences at regional campuses, and improve storage of, and public access to, Queensland Museum's unique collections. Program highlights include:

- the ongoing development of the National Carriage Factory project at the Cobb+Co Museum, Toowoomba.
- detailed design and construction of the 'Archie's Shipwreck' exhibition at the Museum of Tropical Queensland.
- an investment of \$2.8 million (\$1.5 million in 2008-09) to enhance the collection, storage and management of the Queensland Museum's State Collection, including \$0.24 million to upgrade web-based services.

Queensland Performing Arts Trust

The Trust's capital expenditure program for 2008-09 is \$0.75 million to meet property, plant and equipment requirements, such as theatrical and musical production equipment.

Southbank Institute of Technology

Southbank Institute of Technology will continue to invest in technology to ensure that it maintains the core ICT infrastructure at a level that ensures outstanding learning experiences. The Southbank Education and Training Precinct, a Public Private Partnership project at the Institute's South Brisbane campus, will be finalised.

Notes:

- 1. Capital grants are distributed by non-state entities throughout Queenslands statistical divisions.
- 2. Project budgets listed in the table are in some cases indicative and are subject to refinement as projects are further developed.
- 3. Projects contained in the table have been included on the basis of projected enrolments. If projected enrolments do not eventuate, then listed projects may be deferred or stopped, or new projects added during the course of the financial year.
- 4. The amounts quoted in the above table reflect the estimated portion of project costs that will be capitalised. The amounts quoted in the program highlights, Agency Service Delivery Statements and the Regional Budget Statements are the full financial costs of projects (i.e. they include some expensed items).
- 5. The Australian Government may also contribute funding for these projects.

ELECTORAL COMMISSION OF QUEENSLAND

An amount of \$0.04 million is allocated towards the replacement of plant and equipment in 2008-09 to provide for the ongoing operational requirements associated with the efficient and effective provision of electoral services for the State of Queensland.

EMERGENCY SERVICES

The department's 2008-09 capital program will invest \$160.6 million in capital acquisitions and grants to ensure essential services to minimise the risk and impact of accidents, emergencies and disasters.

A major feature is the investment of \$29.3 million (as part of a total allocation of \$76.1 million) to build a new integrated communication and state emergency operations centre to enable more effective management of large scale emergencies and disasters in Queensland. The investment involves upgrading and replacement of radio and information and communications technology (ICT).

- capital investment of the final \$2.6 million (as part of a total allocation of \$48.7 million) to enhance Emergency Management Queensland's helicopter rescue fleet with three AgustaWestland 139 helicopters to improve the level of service for aeromedical, search and rescue operations, and emergency management capability across Queensland.
- \$4.5 million for additional plant and equipment for Emergency Management Queensland, including an additional \$3.9 million for the purchase of important helicopter safety equipment including forward looking infra-red (FLIR), neonatal equipment and night vision goggles has been provided.
- total outlays of \$68.5 million are provided for new ambulance facilities, vehicles, operational equipment, and ICT improvements; and \$49.5 million is provided for fire facilities, urban and rural fire appliances, operational equipment and ICT improvements.
- two new ambulance stations, 21 replacement or redeveloped facilities will be commenced or completed during 2008-09 and a further \$2.2 million has been provided for minor works on ambulance service facilities.
- three new fire stations and 11 replacement or redeveloped facilities will be commenced or completed during 2008-09.
- \$2.2 million will be invested to complete a replacement joint fire and ambulance facility at Palm Island.
- \$16.9 million will be invested in more than 145 new ambulance vehicles to ensure an efficient fleet and provide vehicles for the additional ambulance officers commencing service.
- \$13.4 million will be invested in 30 new or replacement urban fire and rescue appliances as part of the fleet replacement program to meet enhanced service delivery.

- investment will occur for continued improvement of ICT and communications and operational equipment for ambulance services (\$14.0 million), and for fire and rescue services (\$10.4 million).
- investment in strategic land purchases will occur for ambulance services (\$4.2 million) including a land acquisition at Bellbowrie, and land for fire and rescue services (\$1.1 million).
- the Queensland Ambulance Service and the Queensland Fire and Rescue Service will invest \$1.3 million (as part of a total allocation of \$20 million) to finalise a major expansion of the Queensland Combined Emergency Services Academy as an operational, multi-service and multi-agency training centre of excellence for emergency management and community safety.

EMPLOYMENT AND INDUSTRIAL RELATIONS

- Expenditure on capital items is expected to total \$1.6 million in 2008-09. The department will be investing a further \$0.40 million, in addition to the \$0.74 million invested in 2007-08, to complete an information technology system for the Renewable and Photographic Licensing for Prescribed Occupations as required under the National Standard for the Licensing of Persons Performing High Risk Work.
- Other key areas of expenditure will be focused mainly on ICT systems, replacement of operational equipment and new accommodation fit-outs.

ENVIRONMENTAL PROTECTION AGENCY

The 2008-09 capital program for the Environmental Protection Agency (EPA) is \$44.7 million and provides for the continuing protection of Queensland's natural and cultural heritage through the ongoing replacement and construction of new infrastructure as well as funding significant land acquisitions. Such significant investment demonstrates the Government's commitment to its priority of Managing climate change and protecting the environment.

- \$15.8 million for capital works on Parks, Forests and Administrative Building Works, for the construction of infrastructure on EPA estate. Of this \$13.8 million relates to capital works on parks and forests and another \$2 million relates to the Administrative Building Works program. A further \$1.2 million has been allocated to three significant projects in the Great Barrier Reef Marine Park.
- Funding of \$0.5 million has been allocated for the completion of the Ma:Mu Canopy Walk which commenced construction in 2007-08 with a total cost of \$10 million.
- \$20 million has been provided in 2008-09 for land acquisitions which relates to a 2006 election commitment for the purchase of rainforest and green land.

HEALTH

The total capital program for Queensland Health will see \$1.024 billion invested in new capital acquisitions in 2008-09, which includes the Queensland Institute of Medical Research funding of \$2.2 million.

Queensland Health

The Queensland Health capital works program is an important input into the delivery of health services and outputs that underpin the Government's priorities of improving health care and strengthening services to the community and managing urban growth and building Queensland's regions. The program also supports Queensland Health's commitment to creating dependable health care and better health for all Queenslanders.

In 2008-09, Queensland Health will continue its capital investment across a broad range of health care settings including community health centres, hospitals, health technology, pathology and scientific services, renal, mental health, residential care, staff accommodation, and information and communication technologies. This program will ensure that health infrastructure and assets support the delivery of health services and contribute to improved health outcomes.

- A total of \$654.7 million will be invested in 2008-09 on major hospital projects.
 - \$230.8 million in 2008-09 will be spent to continue the planning and development of the new tertiary hospitals at the Gold Coast, Sunshine Coast and the Queensland Children's Hospital in Brisbane. Queensland will invest a total of \$3.803 billion over a number of years to establish these new tertiary hospitals.
 - \$37.5 million is planned to be expended in 2008-09 in the redevelopment of Cairns, Mackay and Mount Isa hospitals. A significant investment, expected to be in the order of \$920 million, is foreshadowed for these projects.
 - it will also meet the cost of additional works in response to demand management requirements throughout the state, for which \$100 million is allocated in 2008-09.
 - additionally, \$21.7 million will be spent in 2008-09 on continuing the establishment of the Elective Surgery Centre at the QEII Hospital, with \$3 million to be invested in elective surgery at Logan Hospital.

- other hospital redevelopments at Bundaberg, Ingham, Robina, Rockhampton, the Prince Charles and Yeppoon Hospitals, and Emergency Department upgrades at the Princess Alexandra, Rockhampton, Redcliffe and Robina Hospitals will also be progressed.
- overall, \$1.070 billion will be invested over the next four years to increase bed capacity and expand health services at Bundaberg, Cairns, Rockhampton, Robina, Townsville, and Princess Alexandra Hospitals and on the Sunshine Coast.
- In 2008-09, \$140.4 million will be invested in continuing community based projects including a new Chronic Disease and Prevention Management Centre on Thursday Island, community health services at Cairns and Gladstone, South East Queensland Infrastructure Plan and Program (SEQIPP) initiatives at Browns Plains, North Lakes, Robina and Sunshine Coast, redevelopment of Miles and Weipa Hospitals. This includes \$17.3 million to continue the delivery of primary health care centres at Hope Vale, Saibai Island and Yarrabah and a multi-purpose health service at Collinsville.
- A feature of the expenditure on community health in 2008-09 is investment of \$6.7 million in the provision of eight indigenous health hubs as part of the Government's commitment to address alcohol and drug treatment requirements in Indigenous communities. These alcohol and drug treatment hubs will be established in Weipa, Mt Isa, Bamaga, Mossman, Cooktown, Palm Island, Woorabinda and Cherbourg. They will add significantly to the amount of social infrastructure in Indigenous communities that is a vital component of the Indigenous Health Equality intent and part of the Government's program to reduce indigenous alcohol and substance abuse.
- In 2008-09, \$56.1 million will fund provision of health technology equipment.
- The enhancement of Renal Services in Queensland will continue in 2008-09, with \$3.2 million invested in renal projects at Princess Alexandra Hospital and Redland Hospital, home dialysis related services, and planning of renal services in areas including Kingaroy, Sunshine Coast and Logan.
- \$12.8 million will be invested in 2008-09 for mental health services.
- Replacement of the residential aged care facility in Nambour will continue, with total planned expenditure of \$13.8 million.
- \$17.4 million will be invested in 2008-09 towards projects to upgrade staff accommodation including \$6.5 million for the Regional Accommodation program. Additionally, staff accommodation projects will continue at Cape York, Rockhampton and Roma.

- \$7.3 million will be invested in 2008-09 on the forensic laboratory, infrastructure and information systems upgrades for Forensic and Scientific Services. A major redesign and refit of the DNA testing laboratory will provide the environment and technologies necessary to perform High Sensitivity DNA analysis. The investment will also fund additional analytical equipment, upgrade accommodation, improve water conservation and water supply management and upgrade AUSLAB software.
- A total of \$149.6 million, consisting of \$73 million capital and \$76.6 million non capital expenditure, will be invested in information and communication technology projects in 2008-09.
- A total of \$44.5 million will be invested into projects across the program areas of Acute Care, Administration, Ambulatory Care, Chronic Disease Care, Clinical Support, Promotion, Protection and Prevention, Rehabilitation and Extended Care. These are a series of interlinked programs that will contribute to the objectives of the e-Health strategy. The e-Health strategy will enable the enhanced delivery of health services. Key highlights of this investment include:
 - ongoing statewide rollout of a new Radiology Information System enabling the reduction of time taken for radiologists to view, assess and diagnose medical problems significantly;
 - implementation of digital technology for breast screening that will enable faster communication of the results to patients and the potential for improved detection of breast cancer;
 - ongoing implementation of an Enterprise Discharge Summary to provide a more accurate care record to consumers and improve communication to General Practitioners; and
 - Information and Communication Technology projects to enable secured system access, integration of existing systems and manage reference datasets.
- \$28.5 million for information and communication technology equipment to replace, upgrade and provide future capacity/capability to support the e-Health strategy and clinical information solutions. This investment incorporates telephone system replacements, network and server upgrades.

The Council of the Queensland Institute of Medical Research

The QIMR capital program in 2008-09 will total \$2.2 million for acquisition of new or replacement equipment including computer software upgrade and state of the art scientific equipment.

HOUSING

The department's 2008-09 capital program of \$516.9 million underpins the provision of a range of social housing solutions across the department's outputs and includes \$125 million from the Queensland Future Growth Fund.

In 2008-09, the department will continue to address the challenges of increasing demand for social housing that results from rising living costs and decreasing availability of affordable housing in the private market. Expanding the supply of social housing and improving access to housing assistance for those clients in greatest need will continue to be a priority, as will the continuing development of new products and services to assist people to find or maintain a private rental home or buy their own home.

The Queensland Government's four-year, \$235.5 million Responding to Homelessness initiative reaches its conclusion in 2008-09. The department's capital funding commitment of \$7.4 million in the final year of this initiative will further expand the housing supply to accommodate people at risk or already experiencing homelessness.

The department will provide a further \$11 million in 2008-09 as part of the Government's Spinal Cord Injuries Initiative to commence the construction of 11 dwellings, complete 23 dwellings and acquire land to facilitate future construction. This cross-agency initiative will provide housing and support to assist people with spinal injuries to leave hospital when they no longer require hospital care.

Under the Council of Australian Governments' National Mental Health Plan, the Queensland Government has allocated \$10 million in 2008-09 to fund the purchase of 35 dwellings across Queensland to provide housing for clients with severe mental illness and moderate to high support needs.

Program Highlights

The department will expand the supply and improve the amenity of social housing dwellings through capital investment and capital grant funding including:

- \$304.2 million in funding for the Public Housing and Aboriginal and Torres Strait Islander Housing rental programs and the Long Term Community Housing Program to:
 - purchase or commence construction of 634 dwellings, complete construction of 375 dwellings commenced in previous years, and purchase and develop land to facilitate future construction of social housing dwellings; and
 - enhance the condition of existing social housing dwellings through general upgrades.

- \$74.3 million in funding for upgrades to existing properties and new and replacement dwellings for the 34 Aboriginal and Torres Strait Islander communities. Construction will be completed on 103 new dwellings, 35 dwellings replaced and 271 dwellings upgraded. In addition, construction will commence on seven new dwellings and 14 properties will be purchased outside of Indigenous communities
- \$63.4 million in funding for Community-managed Housing Studio Units to purchase or commence construction of 210 dwellings, complete construction of 193 dwellings commenced in previous years, upgrade existing dwellings and acquire land to facilitate future construction
- \$13.5 million in funding for the Crisis Accommodation Program to commence construction of two shelters comprising of 12 units of accommodation, complete construction of 19 dwellings and six shelters comprising of over 20 units of accommodation, purchase eight dwellings and upgrade existing dwellings and shelters
- \$4.9 million to complete the redevelopment of the Lady Bowen Complex to provide housing options for people at risk of homelessness in inner Brisbane
- \$5 million in capital grants to the Brisbane Housing Company that, combined with allocations from previous years, will provide approximately 111 dwellings to low-income households throughout the year
- \$2.6 million in capital grants for the Gold Coast Housing Company to provide affordable housing to low-income households on the Gold Coast
- \$15.6 million in capital grants to complete construction of up to 117 dwellings for affordable housing in the Whitsunday and Gold Coast regions
- \$13.5 million in funding to acquire suitable land for housing development to assist with increasing the supply of affordable housing.

The department will continue to create better opportunities and outcomes in renewal communities through the allocation of \$4.5 million towards improving community facilities and neighbourhood amenities in targeted areas of Queensland under the Community Renewal program.

INFRASTRUCTURE AND PLANNING

The 2008-09 capital expenditure budget for Infrastructure and Planning, including Property Services Group, water infrastructure projects and Airport Link is \$2.450 billion.

The department's role is to guide major resource and infrastructure projects to fruition, to ensure the timely delivery of both social and economic infrastructure in a way which is not only sustainable but which also delivers benefits to all Queenslanders and to lead local, regional, statewide planning initiatives and land use.

The Government has established a number of special purpose vehicles to provide rigorous governance, management and delivery of major infrastructure including the Western Corridor Recycled Water Project, Southern Regional Water Pipeline, South East Queensland (Gold Coast) Desalination Plant, other key water infrastructure projects and the Airport Link toll road and initial stages of the Northern Busway.

Program Highlights

- Western Corridor Recycled Water Project design, construction and operation of
 the largest recycled water project in Australia will continue, including
 development of advanced water treatment plants and approximately
 200 kilometres of pipeline as part of the Government's solutions to secure South
 East Queensland's water supply future by supplying purified recycled water to
 industry and to supplement supply to the Wivenhoe Dam.
- South East Queensland (Gold Coast) Desalination Plant construction of the 125 megalitres per day desalination plant at Tugun will continue. The project has an estimated total cost of \$1.209 billion, of which \$448.1 million is projected to be spent in 2008-09. The project demonstrates the Government's commitment to providing vital rainfall independent water infrastructure for South East Queensland and is on schedule to commence operations in November 2008. The project is currently a joint project between the State Government and the Gold Coast City Council (GCCC). The State is proposing to purchase the balance of the GCCC shares in the project by 30 June 2008 to acquire full ownership of the asset.
- Southern Regional Water Pipeline construction of the 130 megalitres per day two-way \$901 million Southern Regional Water Pipeline between Brisbane and the Gold Coast will be completed by November 2008, including laying approximately 96 kilometres of pipeline and construction of ancillary works.

- Northern Pipeline Interconnectors Stage 1 involves the construction of a 47 kilometre pipeline to transport up to 65 million litres of potable water per day from Landers Shute Water Treatment Plant to Morayfield Reservoirs and will be completed by December 2008. The investigation and assessment for Stage 2 of the Northern Pipeline Interconnectors will continue to determine preferred alignment for the pipeline between Landers Shute and Noosa Water Transport Plant near Cooroy.
- Eastern Pipeline Interconnectors involves the construction of an additional reservoir at Heinemann Road in Redland City and an 8.6 kilometre pipeline and pump station to link to Kimberley Park in Logan City. The works will connect Redland City to the South East Queensland Water Grid and be completed by December 2008.
- Traveston Crossing and Wyaralong Dams work will continue on the environmental impact assessment processes and subject to approval, commencement of construction for the proposed Traveston Crossing Dam and the proposed Wyaralong Dam to meet expected delivery times to address the long-term water demands of the South East Queensland region. The Traveston Crossing Dam will involve the construction of a 153,000 million litre storage delivering up to 70,000 million litres per annum. The Wyaralong Dam will involve the construction of 103,000 million litre storage. When operating with the recently completed Cedar Grove Weir and Bromelton Offstream storage, it will provide 26,000 million litres per year to the people of South East Queensland.
- Airport Link construction of the Airport Link toll road, from Windsor to Clayfield and sections of the Northern Busway, will most likely commence around the end of 2008, with the project open in 2012.
- Stanwell Gladstone Infrastructure Corridor the department will continue the development of the corridor. The corridor will be able to accommodate up to seven underground pipelines in a single area for uses including water, mineral slurries and telecommunication cables. The project will deliver essential services and efficiently transport industrial material throughout the area.
- The South East Queensland (SEQ) Water Grid Manager will manage and oversee the operation of the SEQ Water Grid to ensure security of supply. To do this, the SEQ Water Grid manager will purchase water services from the supply and transport services and sell water to the retailers and other Grid customers. The SEQ Water Grid Manager will also ensure that SEQ water sources are secure and stable into the future. In 2008-09 the SEQ Water Grid Manager will begin operation and is projected to spend \$2.6 million on initial capital set up costs.

Property Services Group

The Property Services Group delivers the property services component of the Industry Location Scheme. Key functions of the group include the acquisition, planning and development of land for business and industry locating to or expanding in Queensland.

The Group's capital expenditure plan for 2008-09 totals \$109.8 million.

Construction of the following projects is expected to proceed in 2008-09 once development approvals are obtained:

- \$26.6 million to construct Stage 1 of the Coolum Industrial Estate
- \$6.0 million to construct Stage 6 of the Bohle Industrial Estate
- \$6.9 million to complete development of the South Mackay Industrial Estate
- \$2.0 million to complete construction of the Yandina Industrial Estate expansion.

The following land acquisitions are planned for 2008-09, subject to negotiations:

- \$2.0 million for the acquisition of additional land for the Amberley Aerospace Park
- \$8.0 million for the acquisition of land for the future development of industrial estates in Far North Oueensland
- \$11.0 million for the acquisition of land to extend the Gladstone State Development Area
- \$6.0 million for the acquisition of land for the future development of industrial estates in the Mackay region
- \$2.0 million for the acquisition of land for the future development of industrial estates in the Rockhampton region; and
- \$6.5 million for continued acquisitions within South East Queensland for the future development of industrial estates.

Note:

^{1.} Total estimated cost includes land acquisition and early works, but excludes expenditure on land acquisition undertaken by the Department of Main Roads for the project (\$36.3 million), and the additional expenditure announced for the project on 19 May 2008, due to timing of contractual close.

JUSTICE AND ATTORNEY-GENERAL

The 2008-09 capital expenditure program for Justice and Attorney-General (Department of Justice and Attorney-General, Public Trust Office, Legal Aid Queensland, Crime and Misconduct Commission and Anti-Discrimination Commission Queensland) is \$332.7 million.

The Department of Justice and Attorney-General's capital expenditure program for 2008-09 is \$318.7 million. The department's capital program focuses on designing, constructing and managing facilities and assets to ensure the services in the justice system are effective, accessible and safe.

Program Highlights

- \$236.2 million is provided for the construction of the new Supreme and District Courts complex.
- \$52.4 million is provided for the construction of a new courthouse and watchhouse at Ipswich to cope with the growing population in this area. This is part of a combined facility including a watchhouse and a police station.
- \$2.9 million is provided to construct a courthouse at Mareeba. The courthouse, featuring a high-tech courtroom, prisoner holding cells and facilities for victims of crime and vulnerable witnesses, will form part of a project with a new police station and watchhouse.
- \$2.8 million is provided for the fitting out of floor four of the Brisbane Magistrate Court (BMC). This floor was not fitted out at the time of construction of the BMC.
- \$4.6 million is provided to further develop the Integrated Justice Information Strategy which will deliver improved information sharing and operational efficiencies across the criminal justice system.

The 2008-09 capital expenditure program for the Public Trust Office is \$8 million. This expenditure will enable the office to continue to provide a wide range of efficient services to the Queensland community on a self funded basis. The Public Trust Office will source the investment for these capital assets from its own funds at no cost to Government. The Public Trust Office will spend \$5 million on two new office buildings to continue delivery of services in areas of greatest need in South East Queensland and \$2.1 million on the refurbishment of existing offices throughout Queensland.

Legal Aid Queensland will invest \$3.1 million in capital projects in 2008-09, including \$0.70 million on new leased accommodation in North Quay for dispute resolution conferencing.

The 2008-09 capital expenditure program for the Crime and Misconduct Commission (CMC) is \$2.5 million. The CMC will be relocating from Terrica Place to Green Square in Fortitude Valley in 2008. The CMC will invest \$13.6 million in relation to fitout costs associated with this relocation, the majority of which was expended in 2007-08. In addition, the CMC will invest \$0.78 million in capital projects relating to computer and motor vehicle replacements in 2008-09.

The 2008-09 capital expenditure program for the Anti-Discrimination Commission Queensland is \$0.43 million. One-off funding of \$0.39 million will be spent in 2008-09 on the development and implementation of a new Case Management System.

LEGISLATIVE ASSEMBLY OF QUEENSLAND

Capital outlays in property, plant and equipment are critical to the delivery of the Legislative Assembly and Parliamentary Service output. The 2008-09 capital program of \$3.6 million is principally allocated to the replacement of major air conditioning plant within the Parliamentary Precinct, an upgrade of the toilet facilities on Members' Office floors, and an upgrade of Electorate Office equipment. Funding is also directed to the ongoing Parliament House Stonework Restoration Program and a range of minor capital works projects designed to improve the functionality and performance of existing building infrastructure.

LOCAL GOVERNMENT, SPORT AND RECREATION

The Department of Local Government, Sport and Recreation capital works and grant and subsidy programs will provide \$467.6 million in 2008-09 to assist local government, community sport and recreation organisations, Indigenous organisations and schools to build vibrant, more sustainable communities.

Department of Local Government, Sport and Recreation

The majority of capital expenditure incurred by the department relates to capital grants and subsidies to assist with the:

- creation or upgrading of a range of essential community infrastructure such as water supply, sewerage works, roads and drainage works.
- building or upgrading of community sport and recreation facilities which enhance the opportunities for Queenslanders to participate in an active, healthy lifestyle.

Other capital expenditure by the department is associated with supporting the delivery of the State Tennis Centre, improving the quality and accessibility of facilities at a number of the State's Active Recreation Centres, and to ensure the ongoing maintenance and provision of an appropriate level of office equipment and information technology hardware at each of the department's sites across Queensland.

Program Highlights

- A record \$12.5 million investment through the Minor Facilities Program to support community sport and recreation clubs improve the standard and availability of their facilities.
- Launching a new \$30 million round of the Major Facilities Program to support the development of major community sport and recreational facilities.
- Up to \$8 million over four years from 2008-09 for the Regional Tennis Facilities Program to provide regional standard tennis facilities in Mount Isa, Cairns, Townsville, Rockhampton and Toowoomba.
- Up to \$5 million out of total funding of \$25.5 million over five years under the Fluoride Capital Assistance Program to undertake capital works outside South East Queensland for the introduction of fluoridation.
- \$3 million in 2008-09 for the construction of three new Sewerage Treatment Plants in Tin Can Bay, Cooloola Cove, and Rainbow Beach to benefit the growing communities of the Gympie Region.
- \$14 million under the Indigenous Environmental Health and Infrastructure Program to provide essential community infrastructure in the Torres Strait region, including major sewerage projects at Mabuaig and Moa Islands.

Stadiums Queensland

The capital program for Stadiums Queensland reflects the investment required to develop and maintain the State's stadia to a standard appropriate for the conduct of national and international events. The program will provide \$14.5 million in 2008-09 which includes the development of a criterion track near the Sleeman Sports Complex at Chandler and the upgrade of facilities at the Brisbane Entertainment Centre.

MAIN ROADS

The 2008-09 capital expenditure program for Main Roads (which includes Queensland Motorways Limited and RoadTek) is \$3.235 billion. Main Roads strategically manages, plans, develops, operates and maintains the State-controlled road network. Key service delivery priorities in 2008-09 are to continue to:

- improve safety of the road environment
- achieve reliable delivery of the Government's priority projects including election commitments and other specific initiatives, such as South East Queensland Infrastructure Plan and Program (SEQIPP) projects, the regional bridge renewal, and accelerated road rehabilitation programs
- preserve and maintain the state's largest built community asset the 33,550 kilometre state-controlled road network with an estimated value of \$37.285 billion
- manage the impact of urban traffic growth and congestion, and improve the reliability of service to industry and the community in our major urban centres
- plan and prioritise future works to meet the long-term needs of industry and the community within specified state and federal funding limits.

Main Roads' capital program enhances, rehabilitates and preserves the road network throughout Queensland. Capital investment in the road system generates long-term benefits to the people of Queensland by delivering safer, more efficient and more convenient transport, for both industry and the community in general.

Safety remains a number one priority for Main Roads. The department will continue its emphasis on safety through programs such as the Safer Roads Sooner initiative, with \$47 million allocated in 2008-09 towards road safety capital programs (\$235 million over the next five years).

Program Highlights

- \$537.6 million is provided to construct a second Gateway Bridge river crossing and to increase capacity on the Gateway Motorway, between Mt Gravatt-Capalaba Road and Nudgee Road, at a total estimated cost of \$1.883 billion.
- \$200 million is provided towards the federally-funded Ipswich Motorway upgrade between Wacol and Darra, at a total estimated cost of \$700 million.
- \$168.7 million is provided towards the Centenary Highway duplication between Springfield and Darra, in conjunction with the Darra to Springfield rail extension, at a total estimated cost of \$414.6 million.

- \$150 million is provided towards the construction of the new Houghton Highway Bridge between Brighton and Redcliffe, at a total estimated cost of \$315 million.
- \$100 million is provided towards the federally-funded Ipswich Motorway upgrade to complete the upgrade of the Ipswich/Logan Motorway interchange, at a total estimated cost of \$255 million.
- \$70.7 million is provided to upgrade the Pacific Motorway between the Gateway Motorway and the Logan Motorway and between Nerang and Tugun, at a total estimated cost of \$910 million (\$455 million State, \$455 million Australian Government).
- \$66 million is provided towards the duplication of the Forgan Bridge in Mackay, at a total estimated cost of \$128 million.
- \$50 million is provided to improve flood immunity on the federally-funded Bruce Highway between Corduroy Creek and Tully High School, at a total estimated cost of \$172.4 million.
- \$42.3 million is provided towards Stages 2 and 3 of the Townsville Ring Road, at a total estimated cost of \$119.2 million (\$39.8 million State, \$79.5 million Australian Government).
- \$34.5 million is provided towards construction of the Bundaberg Ring Road, at a total estimated cost of \$92 million.
- \$32.4 million is provided for construction of the Pacific Paradise interchange and access to David Low Way on the Sunshine Motorway, west of Pacific Paradise, at a total estimated cost of \$85 million.
- \$27.2 million is provided to widen Caloundra Road to four lanes between the Bruce Highway and Pierce Avenue, 7km west of Caloundra, at a total estimated cost of \$80 million.
- \$24.4 million is provided to construct a bridge and approaches at Mulgrave River, south of Cairns, on the federally-funded Bruce Highway, at a total estimated cost of \$50 million.
- \$24 million is provided in federal funding to widen the Bruce Highway in Gympie to four lanes between Kidgell Street and Pine Street, at a total estimated cost of \$70.8 million.
- \$20 million is provided to widen the Gold Coast Highway to four lanes between Government Road and Robert Street, at a total estimated cost of \$128 million.

- \$20 million is provided towards the federally-funded Ipswich Motorway upgrade for planning and land acquisitions for the upgrade to six lanes between Dinmore and Goodna, at a total estimated cost of \$50 million.
- \$18 million is provided to continue widening to four lanes in sections between Santa Barbara Road and Columbus Drive, on Hope Island Road, at a total estimated cost of \$109 million.
- \$17 million is provided to widen the remaining 2 lane sections of North Ward Road to 4 lanes between Walker Street and Gregory Street on the northern approach of Townsville City, at a total estimated cost of \$19 million.
- \$12.1 million is provided towards paving and sealing the Roma Taroom Road to support oil and gas development and improve regional community access, at a total estimated cost of \$29.7 million.
- \$11.6 million is provided towards construction of the Hospital Bridge in Mackay, at a total estimated cost of \$33.6 million.
- \$10.7 million is provided to widen the New England Highway and realign the highway at the Pechey Range between John Street, Crows Nest and Millard Road, at a total estimated cost of \$12.6 million.
- \$10 million is provided to commence realignment of the Dawson Highway at the Calliope Range, at a total estimated cost of \$70 million.
- \$10 million is provided to widen and seal the New England Highway between Munro Road and Pioneer Road, south of Crows Nest, at a total estimated cost of \$13.6 million.
- \$9.1 million is provided to continue design and construction of the jointly-funded Townsville Port Access Road, at a total estimated cost of \$190 million.
- \$7.5 million is provided to complete the replacement of the Ward River and Woolshed Gully bridges with a single 260 metre long, six metre high, dual lane bridge on the Diamantina Developmental Road, west of Charleville, at a total estimated cost of \$15 million.
- \$7.4 million is provided to widen, repair and strengthen the Flinders Highway at Jardine Valley, between Charters Towers and Hughenden, at a total estimated cost of \$8.8 million.
- \$6.3 million is provided to reconstruct the pavement on the Dawson Highway between Meteor Creek North and Three Chain Road, at a total estimated cost of \$6.7 million.

- \$6.1 million is provided to repair, strengthen and widen the D'Aguilar Highway between Villeneuve Road and Arnolds Road North, East of Kilcoy, at a total estimated cost of \$6.3 million.
- \$5.5 million is provided for paving and sealing sections of the Wills Developmental Road between Gregory and the Doomadgee turnoff, south of Burketown, at a total estimated cost of \$7.5 million.
- \$3.1 million is provided for paving and sealing three sections of the Diamantina Developmental Road between Windorah and Bedourie, at a total estimated cost of \$4.4 million.

Note:

The 2008-09 Budget excludes expenditure announced for EWAG on 19 May 2008, due to the timing of contractual close.

MINES AND ENERGY

The department's 2008-09 capital acquisition program of \$15.4 million comprises expenditure to support the continuing development of the State's minerals and energy industries including construction of a new drill core storage facility at Mount Isa (\$2.4 million) and the upgrading of the hardware and software for key departmental systems (\$1.5 million and \$1.4 million respectively).

CS Energy Limited

A \$201.6 million capital expenditure program is planned for 2008-09. This reflects the continued commitment to the ongoing reliability and efficiency of the plant and electricity supply and includes:

- \$110 million has been provided in 2008-09 for improvements to the Callide Power Station including overhauls and major refurbishment work, to ensure ongoing reliability and efficiency of the plant.
- \$59.8 million has been provided in 2008-09 for improvements to the Swanbank Power Station including major overhauls, to ensure ongoing reliability and efficiency of the plant.
- \$19.2 million has been provided in 2008-09 for efficiency enhancements to the Kogan Creek Power Station.
- \$12.4 million has been provided in 2008-09 for improvements to the Mica Creek Power Station including major overhauls, to ensure ongoing reliability and efficiency of the plant.

ENERGEX Limited

The ENERGEX Group has prepared a capital program of \$911.1 million. This includes electricity upgrades to support significant commercial infrastructure in Brisbane and improves and reinforces electricity supply to Brisbane, the Sunshine and Gold Coasts. The regulated electricity capital expenditure program for 2008-09 is \$830 million. This includes \$491 million on the sub transmission system, and \$339 million on the distribution network. The capital program will match the high growth in electricity usage being driven by a strong Queensland economy and increased use of lifestyle enhancing appliances, such as air conditioners. The capital works program for 2008-09 will contribute to the improved level of reliability of electricity distribution and includes the following projects:

• \$19.8 million in 2008-09 to establish a new bulk supply substation at Myrtletown. This substation will ensure reliable electricity supply to the water recycling plant, Brisbane Airport, and the other significant commercial infrastructure in the area.

- \$16.1 million in 2008-09 to establish a new bulk supply substation at Sandgate, to increase network capacity.
- \$9 million in 2008-09 to install two transformers in Merrimac to boost network capacity.

Stanwell Corporation Limited

Stanwell Corporation Limited's expected capital expenditure for 2008-09 is \$91.3 million. This relates to improving the efficiency of existing generation assets at Stanwell, Barron and Kareeya. Projects include:

- \$49 million in 2008-09 for major overhauls and efficiency upgrades at Stanwell Power Station.
- \$2.1 million in 2008-09 for a focus on emission reductions through the investment in low nitrogen oxide burners at Stanwell Power Station.
- \$3.6 million in 2008-09 for ongoing capital works at the Kareeya and Barron Gorge Hydro Power Stations.

Tarong Energy Corporation Limited

Tarong Energy's capital expenditure program for 2008-09 of \$224.2 million relates to the Kunioon Development Project and maintaining operations at the Tarong Power Station, Tarong North and Wivenhoe Power Stations. Projects include:

- \$86.1 million in 2008-09 for expenditure on the Kunioon Development Project, including land acquisitions of \$43 million.
- \$17.3 million in 2008-09 for a major overhaul of Unit 1 at the Tarong Power Station.
- \$17.5 million in 2008-09 for a major overhaul of Unit 2 at the Tarong Power Station.
- \$15.7 million in 2008-09 in relation to the installation of low nitrogen oxide burners at Tarong Power Station.

Powerlink Queensland

Powerlink Queensland is the high voltage electricity transmission entity for Queensland. Powerlink Queensland's budgeted capital expenditure for 2008-09 is \$675.4 million and includes:

• \$31.1 million in 2008-09 towards construction of a 275kV transmission line between Powerlink's existing South Pine Substation and ENERGEX's existing Sandgate Substation. The project will help reinforce electricity supply to the north eastern Brisbane area, and is expected to be completed in summer 2009-10.

- \$6.8 million in 2008-09 to complete a project to replace the existing aged Kareeya to Innisfail transmission line with a new 132kV transmission line between Tully and Innisfail, and associated substation and other works. The project will help provide continued reliability of electricity supply to Innisfail, Mission Beach, El Arish and Cairns, and is expected to be completed in mid 2008.
- \$15.8 million in 2008-09 to complete construction of a 275kV transmission line from Powerlinks existing Ross Substation to the proposed new 132kV Yabulu South Substation to reinforce electricity supply in the Townsville region. Construction is expected to be completed in summer 2008-09.
- \$73.2 million in 2008-09 for construction of a 275kV transmission line between Nebo to Strathmore (near Collinsville), expected to be completed in winter 2009. This is the second stage of a three-stage project to reinforce electricity supply to North Queensland.
- \$25.6 million in 2008-09 for the replacement of the 275/132kV Woolooga Substation. The project is expected to be completed in winter 2009 and will help provide continued reliability of electricity supply to Gympie and the Fraser and North Coasts.
- \$53.4 million in 2008-09 towards construction of a new 275/132kV substation at Larcom Creek and to expand the existing substation at the Rio Tinto Alumina Refinery near Gladstone. The project is expected to be completed in summer 2009-10.

Ergon Energy Corporation Limited

Over recent years Ergon Energy has invested heavily in the network to significantly improve its performance, embedding standardisation across different parts of the business and undertaking the initial investment required in systems and processes to improve operational excellence and productivity. The costs of labour and materials are increasing as a result of the commodities boom and an increasingly tight labour market for the skills needed by Ergon Energy. The budgeted capital expenditure of \$1.004 billion for 2008-09 includes a significant number of major projects, which are primarily related to the electricity network and its associated infrastructure, with the objective to improve the quality of supply to domestic and commercial customers. These include:

- \$56 million in 2008-09 for Customer Initiated Works at Dalrymple Bay/Hay Point.
- \$36 million in 2008-09 for Customer Initiated Works for Queensland Gas Company at Miles.

- \$30 million in 2008-09 for reinforcement of supply to North Mackay (Glenella).
- \$15 million in 2008-09 for reinforcement of supply to Townsville (Belgian Gardens).
- \$15 million in 2008-09 for reinforcement of supply to North Rockhampton (Berserker).

NATURAL RESOURCES AND WATER

Capital acquisitions for the Natural Resources and Water portfolio (including the department, Queensland Bulk Water Supply Authority (QBWSA), Queensland Bulk Water Transport Authority (QBWTA), Gladstone Area Water Board, Mount Isa Water Board and SunWater) in 2008-09 is \$322.5 million. A further \$12.8 million is budgeted for departmental capital grant payments in relation to dam upgrades. The department's 2008-09 capital acquisition program of \$58.6 million principally comprises expenditure to support the planning and management of the State's water, land and native vegetation resources.

Program Highlights

- Water security in Queensland is a critical issue. The acquisitions of land for future water infrastructure projects will continue with \$41.9 million set aside in 2008-09 for strategic land purchases relating to Nathan dam (\$33.9 million) and Connors River dam (\$8.0 million).
- The program of dam spillway upgrades will continue in 2008-09 with \$12.8 million provided for capital grants for this purpose.

Bulk Water Authorities

The QBWSA and the QBWTA were established in late 2007 as part of the Government's institutional reform of urban water supply arrangements in South East Queensland (SEQ), and will assume control of bulk water supply and transport assets in the region. The Authorities have combined capital budgets of \$181.7 million for 2008-09, including \$100 million for stage 3 of the Hinze Dam raising project. Due for completion in December 2010, this project will provide total storage capacity of 309,700 million litres, and deliver an additional 16ML/day into the SEQ Water Grid.

The bulk water businesses of local governments and other SEQ water entities have been progressively transferred to the new authorities over the first half of 2007-08, with the process to be finalised by 1 July 2008. The authorities will pay approximately \$2.1 billion in compensation for the transferring assets. The authorities will also acquire those water supply and transport assets currently being constructed by councils and special purpose vehicle (SPV) companies, which are to form part of the SEQ water grid. Consideration paid for bulk water businesses acquired from local governments and other water entities has not been included in the authorities' capital acquisition program. Capital expenditure by SPV companies on projects to transfer to the authorities is currently recorded under the Department of Infrastructure and Planning.

Water Boards

The Gladstone Area Water Board's capital budget is \$19.8 million for 2008-09. Major projects include preliminary works for a new pipeline from the Fitzroy River to the Gladstone region (\$10.0 million) and implementation of integration of the Board's control and flow metering system (\$2.5 million).

In 2008-09 the Mount Isa Water Board's capital budget is \$12.1 million. Major projects include the Mount Isa terminal reservoir pump station upgrade (\$8 million) and Lake Moondarra pipeline upgrade (\$2.5 million).

SunWater

SunWater's capital budget of \$50.3 million for 2008-09 is primarily focused on prefeasibility studies and the development of business cases for the regional water infrastructure projects including Nathan dam (\$11.1 million), Connors River dam (\$10.3 million) and Fitzroy River weir (\$8.7 million), as well as the Water for Bowen project (\$1.7 million). Other outlays mainly consist of refurbishment and enhancement of existing assets including upgrades to the Mareeba water supply (\$4.9 million), which incorporates the Tinaroo Falls dam spillway upgrade.

Notes:

- Capital expenditure does not include the consideration paid to local government and other water entities in 2007-08 and 2008-09 for bulk water supply and transport assets acquired as a part of the institutional reform of urban water supply arragements in South East Queensland.
- 2. Capital expenditure to 30 June 2008 for stage 3 of the Hinze Dam raising project is being incurred by the responsible local government. From 2008-09, responsibility for the project will transfer to the QBWSA.

OFFICE OF THE GOVERNOR

During 2008-09, the Office of the Governor will expend \$35,000 towards capital replacements including motor vehicles and office equipment.

Ongoing replacement of capital items enables the Governor to undertake the full range of duties expected of the Head of State, including those that promote and support whole-of-Government priorities.

POLICE

The delivery of effective policing services to the community of Queensland requires the establishment and maintenance of appropriate infrastructure. The Queensland Police Service's capital program encompasses a strategic approach that focuses on designing, constructing, and maintaining facilities, information and communication technology, and other equipment needs. An allocation of \$283.4 million in 2008-09 will enable the Service to progress the following key projects.

Program Highlights

- \$147 million is provided to construct new and replacement facilities (including Westgate New Police Academy) and to plan for future facilities identified in the Queensland Police Service Ten-Year Capital Investment Strategic Plan.
- \$77.8 million is provided for information and communication technology and relates to projects identified in the Service's Information Strategic Plan 2001-10, including the Public Safety Network (PSN), Computer Aided Dispatch (CAD) system and Queensland Police Records and Information Management Exchange (QPRIME).
- \$6.4 million is provided for vessel purchases, upgrades, and outfitting. The ongoing water vessels program provides the facilities to meet enhanced service delivery requirements.
- \$52.2 million is provided to support the purchase of other plant and equipment (including motor vehicles).

PREMIER AND CABINET

Capital expenditure for the Department of the Premier and Cabinet including all associated organisations is \$101.0 million.

The department's capital budget of \$7.0 million will see significant enhancements to the department's information and communication capability. The completion of key projects will provide significant benefits to the efficient running of both the department and Government in general.

Program Highlights

- The implementation of the department's Information and Communication Technology (ICT) Infrastructure and Network Strategy;
- SmartCab (Queensland's new Cabinet Information System); and
- A new Electronic Documents and Records Management System (eDRMS).

Commission for Children and Young People and Child Guardian

The Commission for Children and Young People and Child Guardian's capital program for 2008-09 provides for expenditure of \$3.2 million. Major projects to be undertaken are:

- The fitout of office accommodation in accordance with the Commission's Long-term Accommodation Strategy; and
- The development of a new Employment Screening Services Database which will provide for a more efficient blue card application process.

South Bank Corporation

The 2008-09 capital works program for South Bank Corporation is directed at enhancing the experience of visitors to the parklands and the precinct generally, and to the ongoing operational requirements of South Bank Corporation and the Brisbane Convention and Exhibition Centre.

The Government will fund the construction of a Storm Water Harvesting System which is expected to meet 78% of South Bank Parkland's irrigation and water feature needs. The total cost of the project will be \$4.6 million. The installation includes a major stormwater diversion pit, including a collapsible weir to hold back river water and a large capacity stormwater harvesting pump, a further 2 ML storage area and a primary treatment plant and reticulation system to pump Class A recycled water to Parklands irrigation system and water features.

The Brisbane Convention and Exhibition Centre will be expanded, at a total cost of \$130 million, by approximately 24,000 square meters of additional floor space. Key components of the expanded facility are a 600 seat and a 400 seat tiered plenary hall, breakout rooms, foyer/exhibition space, and ground floor restaurant and retail uses.

PRIMARY INDUSTRIES AND FISHERIES

The Department of Primary Industries and Fisheries' (DPIF) capital expenditure program for 2008-09 is \$25 million, which is primarily focused on developing world-class research facilities to deliver excellent scientific outcomes for primary industries and fisheries. DPIF has numerous facilities located throughout rural and regional Queensland. These require a significant level of minor works, mechanical items and other plant and equipment upgrades to keep them operating effectively.

Program Highlights

- \$4.5 million has been allocated to provide a world-class facility for combined fisheries and aquaculture research at the Bribie Island Aquaculture Research Centre. The project includes more efficient and integrated infrastruture including new seawater tank facilities.
- In 2008-09 \$1.1 million will be allocated to the construction of a new facility at the Maroochy Research Station which commenced in 2007-08. Nambour regional office staff will be relocated to the new facility upon its completion, which will provide operational cost savings and synergies by co-locating management, industry development and research staff at the one research station.
- \$1 million has been provided to upgrade fences and stockyards for the Tick Fever Centre specific pathogen free breeder herd relocated from Wacol to Dalby. Biosecurity Queensland's Tick Fever Centre produces a range of vaccines against tick fever, a disease with the potential to cost Queensland's cattle producers up to \$35 million per year in deaths, lost production and restricted access to live cattle export markets.

Forestry Plantations Queensland

The capital expenditure program for 2008-09 is \$16 million. This includes \$7 million for the purchase of freehold land for hardwood plantation establishment, \$5.1 million for the replacement of heavy plant and motor vehicles, \$1.2 million for roads, \$1.2 million for other plant and equipment, \$1.1 million for computer equipment and \$0.4 million to construct buildings and land improvements.

QRAA

QRAA's capital budget for 2008-09 is \$0.6 million. This amount covers information technology software and hardware for the twelve months with the major item being the stabilisation and ongoing development of QRAA's operational software.

PUBLIC WORKS

The department's capital expenditure program for 2008-09, including commercialised business units (CBUs), the Shared Service Agency (SSA) and Corptech, is \$448.8 million. Capital expenditure by the department, excluding CBUs, SSA and CorpTech is \$209.8 million.

Program Highlights

- QFleet will purchase motor vehicles totalling \$128.2 million. The vehicles will be leased to clients to facilitate the delivery of Government services across Queensland. The vehicle purchases and associated ongoing maintenance provide support for local Queensland firms.
- CorpTech, the technology centre of skill established under the Shared Service Initiative, has a capital expenditure program in 2008-09 of \$38.0 million. This program will provide innovative whole-of-Government corporate applications and infrastructure solutions for the shared service providers and to agencies within government.
- \$40.5 million is provided in 2008-09 for the continuing construction of a new government office building in Cairns. The building will provide 9,600 square metres of net lettable area as Stage 2 of William McCormack Place in Hartley Street, Cairns. The total project cost is estimated at \$79.5 million.
- \$24.5 million is provided in 2008-09 for the completion of site infrastructure of works associated with the Boggo Road Precinct redevelopment. The redevelopment will contribute significantly to the Smart State initiatives with the first stage of the proposed knowledge based research and business component providing approximately 60,000 square metres of office and laboratory space for scientific research into eco-science.
- \$31.5 million is allocated in 2008-09 as part of a \$63.3 million project to construct a new footbridge from Tank Street to the new Queensland Gallery of Modern Art at the Queensland Cultural Centre.
- \$21.3 million is allocated in 2008-09 to provide the foundation infrastructure required to enable technology consolidation across government. It encompasses a metropolitan area network, internet service, core network, carrier gateway service, and an initial server and storage platform.

- \$20.2 million is provided in 2008-09 for the construction of Stage 2 (Extension) of the Gold Coast Convention and Exhibition Centre. The extension will provide the Gold Coast with a world class convention and exhibition centre with seating for up to 6,000 patrons by doubling the space in the exhibition hall and allowing the centre to host larger national and international events. Provision for the extension was made during original construction of the centre. The total project cost is estimated at \$40 million.
- \$13.6 million is allocated in 2008-09 for the design and construction of a Joint Contact Centre at Zillmere in Brisbane. The building will accommodate an estimated 417 work points from Smart Service Queensland and Queensland Police Services. The Department of Public Works has been allocated a total capital budget of \$57.4 million.
- \$15 million is allocated in 2008-09 for the construction and upgrade of Government employee housing in rural and remote areas of the State, to support the delivery of Government services in these locations.
- \$10 million is provided in 2008-09 for the government office building at Mareeba. The project includes the purchase of an existing Department of Primary Industries and Fisheries property at Peters Street, Mareeba and the refurbishment of the building to provide new office accommodation. The project will provide improved and efficient office accommodation for four Government agencies in Mareeba. The total project cost is estimated at \$15.5 million.
- \$9.4 million is provided in 2008-09 to continue the construction of a new government office building on Palm Island in order to meet the accommodation needs of Queensland Government agencies. The total project cost is estimated at \$12.9 million.
- \$9 million is provided in 2008-09 to continue the construction of a new government office building at Maroochydore. The building will provide 8,900 square metres of net lettable area on a development site in the Maroochydore Central Business District. The total project cost is estimated at \$84.5 million.

QUEENSLAND AUDIT OFFICE

Information Standard 40 requires the implementation of an electronic document record management solution to appropriately manage all types of records. Queensland Audit Office will be utilising the Queensland Government approved standard product for electronic file management. The estimated cost to progress this project is \$0.18 million. Minor works expenditure of \$0.24 million is to maintain and replace current office and IT equipment.

TOURISM, REGIONAL DEVELOPMENT AND INDUSTRY

Capital expenditure of the Department of Tourism, Regional Development and Industry in 2008-09 is \$138.7 million.

The capital program is designed to provide innovation, direction and leadership to industry.

Program Highlights

- Construction of the Ecosciences Precinct at Boggo Road and the Health and Food Sciences Precinct at Coopers Plains is scheduled to commence in mid 2008, following completion of preliminary works and the satisfactory negotiation of the construction contract. The future development of the precincts will facilitate the co-location of research activities of the Department of Primary Industries and Fisheries, Department of Natural Resources and Water, Department of Mines and Energy, the Environmental Protection Agency and the Commonwealth Scientific and Industrial Research Organisation (CSIRO). Construction of the Ecosciences Precinct at Boggo Road is expected to be completed in the second half of 2010, while the Health and Food Sciences Precinct at Coopers Plains is expected to be completed in late 2009.
- \$10 million in capital grants over the two years to 2008-09 will be provided to Griffith University as matching funding towards the construction costs of an expanded facility at the Institute for Glycomics. This amount is in addition to the \$8 million provided by the Queensland Government to Griffith University in 2001 to construct the Institute for Glycomics.

TRANSPORT

Total capital outlays for the Transport portfolio in 2008-09 will be \$3.653 billion representing a 47% increase in capital expenditure compared with the 2007-08 Budget. The portfolio consists of Queensland Transport, Queensland Rail and the port authorities.

Queensland Transport

Queensland Transport's capital expenditure program for 2008-09 totals \$670.0 million and predominantly comprises investment in public transport infrastructure and systems.

Program Highlights

South East Queensland Infrastructure Plan and Program (SEQIPP)

In the 2008-09 Budget, the Government continues to progress the implementation of the SEQIPP. Some major projects included in the SEQIPP initiative are:

- \$204.5 million towards construction of the Northern Busway between the Royal Children's Hospital and Kedron.
- As part of the Eastern Busway: Buranda to Capalaba program, \$123.9 million is allocated for the construction of the Eastern Busway connection between Buranda and Main Avenue at Coorparoo.
- \$60.3 million towards construction of an Eastern Busway corridor connection from the Eleanor Schonell Bridge to Ipswich Road with stations at Park Road and the Princess Alexandra Hospital.
- \$50 million towards construction of the Eastern Busway: Princess Alexandra Hospital to Buranda. Construction will include an elevated busway station within the Princess Alexandra Hospital and will be a key link in the regional busway network.
- \$33.7 million towards the construction of cycle links to enhance the cycle network in South East Queensland. This is made up of \$10.3 million towards the construction of stated owned cycle links and \$23.4 million in grants to be provided to local authorities.
- \$13.6 million towards construction and design of projects as part of the TransLink Station Upgrade Program.

Recreational Boating Infrastructure

• \$7.3 million towards the construction of new recreational boating facilities. These funds will ensure that future infrastructure demands can be met as the recreational boating population continues to grow.

Regional Airport Development Scheme

• The Blueprint for the Bush initiative, announced as part of the 2006-07 Budget, included an enhanced commitment to the Regional Airport Development Scheme, with investment of \$5 million over three years, including \$1.75 million in 2008-09.

QR Limited

QR is allocating \$2.184 billion for capital outlays in 2008-09 in Queensland.

- \$697.6 million to upgrade infrastructure and rollingstock on the Citytrain network as part of the SEQIPP initiative including:
 - Springfield Line \$130.0 million,
 - Robina to Varsity Lakes \$127.0 million,
 - Caboolture to Beerburrum, Helensvale to Robina and Salisbury to Kuraby duplications \$97 million,
 - Corinda to Darra: Third Track \$78.1 million,
 - Metropolitan Freight Capacity Enhancement \$44.2 million,
 - Additional rollingstock (44 x 3 car units) to deliver substantial service enhancements between the Gold Coast, Brisbane and the Sunshine Coast \$132.2 million.
- \$576.4 million for coal network track works in Central Queensland to allow for additional haulage of coal:
 - Jilalan Yard Upgrade \$400 million,
 - Stanwell to Wycarbah Duplication \$45.2 million,
 - Callemondah 3rd Spur \$14.3 million,
 - Broadlea Mallawa Wotonga Duplication \$32.5 million,
 - Bolingbroke Feeder Station \$22.1 million,
 - Goonyella Abbot Point Expansion (Northern Missing Link) Initial Infrastructure Works \$14.4 million,

- Dalrymple Bay Coal Terminal: 3rd Loop \$11.7 million,
- Harrow Passing Loop (Peak Downs Saraji Passing Loop) \$8.1 million,
- Coppabella Yard Upgrade \$7.3 million,
- Westwood to Wycarbah Duplication \$6.2 million.
- \$303.7 million towards new and upgraded locomotives and wagons to support the increased haulage of coal in Central Queensland including:
 - Coal Electric Loco Fleet Upgrade Stages 1 & 2 \$43.9 million,
 - Electric Loco Upgrade Program \$32.0 million,
 - 510 VCA Coal Wagons \$14.8 million,
 - 15 New Diesel Locomotives (4100 Class) \$68.0 million,
 - 1,190 New Coal Wagons (VCA 106T) \$130.6 million.
- \$ 37.3 million to modify and improve QR facilities and infrastructure for rail travel for disabled persons as prescribed by the Disability Discrimination Act 1992 and to modify the Electric Multiple Unit fleet to meet disability standards for Accessible Public Transport 2007 compliance requirements.
- \$14.1 million to complete the enhancement of Brunswick Street Station.

Port of Brisbane Corporation Limited

In 2008-09, Port of Brisbane Corporation Limited has allocated \$218.9 million for the continuing development of the port. This allocation is driven predominately by the Hamilton Site Redevelopment Program and construction of additional berths at Fisherman Islands, in order to accommodate the strong growth across a range of commodity areas including:

- \$29.4 million for relocation of remaining trades from Hamilton to Fisherman Islands.
- \$23.5 million for the construction of berth and wharf 11 and 12 at Fisherman Islands to accommodate increasing trade throughput at the Port of Brisbane.
- \$16.5 million for the continuation of the Hamilton Site Redevelopment Program.
- \$6 million to construct a bridge across the Burnett River to ensure all weather access to the Port of Bundaberg.
- \$3 million for the upgrade of the Barge Wharf for the dredger "Brisbane", which is owned by the corporation.

Cairns Ports

In 2008-09, Cairns Ports has allocated \$113.6 million towards new and continuing airport and seaport development including:

- \$67.1 million for the redevelopment of the Domestic Terminal Building at Cairns Airport.
- Provision of a new facility for the Australian Quarantine Inspection Service operation in the Cairns area being constructed at the Cairns Airport at a cost of \$6.4 million and \$4.5 million is to be spent in 2008-09.
- \$2.4 million for a plaza development and landscaping for the domestic terminal in 2008-09.
- \$1.5 million for extension of the boardwalk and foreshore promenade to the south in the Cityport area of Cairns.
- \$2.9 million for ongoing preparation and release of sites in the business park at the Cairns Airport as demand dictates.

Gladstone Ports Corporation

In 2008-09, Gladstone Ports Corporation has allocated \$55.7 million towards the ongoing expansion of the ports at Gladstone and Rockhampton including:

- \$18.3 million towards ongoing works at the RG Tanna Coal Terminal at the Port of Gladstone.
- \$5.0 million for the continuation of detailed engineering and feasibility investigations at the Wiggins Island Coal Terminal.
- \$4.3 million for dust suppression measures at the R G Tanna.
- \$8.7 million for the Port General Projects relating to general work around the Port of Gladstone, including road rebuilding, land reclamation and mobile plant replacements.
- \$1.8 million is allocated for the Port of Rockhampton at Port Alma primarily for minor plant and equipment.
- \$0.6 million is allocated primarily for bunding and reclamation at Fisherman's Landing South, and other minor plant and equipment.

Mackay Ports

In 2008-09, Mackay Ports has allocated \$23.1 million for the development and continued upgrading of port and airport infrastructure including:

- \$4.7 million for building a storage and distribution facility for the importation of fertiliser, which is expected to be 60 tonnes per annum.
- \$3 million for rehabilitation of the runway, taxiways, and aprons at the Mackay Airport.
- \$1.2 million for design and construction of additional car park for long term overflow at the Mackay Airport.

Ports Corporation of Queensland Limited

In 2008-09, Ports Corporation of Queensland has allocated \$367.2 million for various port development projects including:

- \$250 million for the Abbot Point X50 Expansion, which will increase the capacity of the Abbot Point Terminal to 50 million tonnes per annum.
- \$70 million for the Abbot Point Expansion X25, which will increase capacity to 25 million tonnes per annum and contribute to increasing the efficiency and capacity of Queensland's coal export industry.
- \$35 million for the renewal of stacker reclaimer 1 and 2 at Abbot Point Coal Terminal.
- \$2.8 million for minor asset replacement and acquisitions at Thursday Island Port.
- \$1.5 million for land acquisition at Louisa Creek.

Port of Townsville

Port of Townsville has allocated \$19.8 million for the acquisition of infrastructure and port improvements during the 2008-09 financial year including:

- \$4.7 million for Berth 1 Services Jetty Duplication for additional access and pipe racks, as well as for maintenance access for the existing pipeline.
- \$3.1 million for the eastern reclamation area for the creation of lots, services and drainage planning and detailed design works for the subdivision of the reclamation area into 19 lots and construction of the transport network, service corridor and open storm water drain.
- \$5.3 million for preliminary engineering works, planning, investigation and design associated with general port infrastructure and facilities.

Note:

Planning and preliminary design.
The 2008-09 Budget excludes the revised expenditure announced for the Northern Busway (Sections 2-4 and 5, Windsor-Kedron) on 19 May 2008, due to the timing of contractual close. 1. 2.

TREASURY

The total capital expenditure program for Queensland Treasury in 2008-09 will be \$32.3 million.

The principal components of Treasury's capital program include:

- \$24 million for the further implementation and development of the Revenue Management System within the Office of State Revenue. The system employs contemporary technology to provide revenue and information management and e-business capability to better service the Government and people of Queensland in collecting and administering State tax revenue streams.
- \$1.2 million provided for scientific equipment for the Racing Science Centre.
- \$4.9 million to be allocated to ongoing asset replacement, primarily the replacement of existing IT assets.
- \$1.9 million to be allocated to the Queensland Office of Gaming Regulation (QOGR). This includes the Data Requirements 3 project which involves development of a new standard that meets the electronic data exchange needs of QOGR and its external clients.

APPENDIX B - KEY CONCEPTS AND COVERAGE

COVERAGE OF THE CAPITAL STATEMENT

Under accrual output budgeting, capital is the stock of assets including property, plant and equipment, intangible assets and inventories that an agency owns and/or controls and uses in the delivery of services, as well as capital grants made to other entities. For the purpose of this Budget Paper, capital outlays refer to the gross acquisition of these assets. The following definitions are applicable throughout this document:

- **total capital outlays** property, plant and equipment outlays, other capital expenditure and capital grants
- **property, plant and equipment outlays** property, plant and equipment outlays as per the financial statements excluding asset sales, depreciation and revaluations
- **other capital expenditure** intangibles, such as software development, and self-generating and regenerating assets
- **capital grants** capital grants to other entities (excluding grants to other Government departments, statutory bodies and individuals under the First Home Owners Grant scheme).

Capital outlays include information for all bodies defined as reporting entities for the purpose of whole-of-Government financial reporting requirements, excluding Public Financial Corporations. Projects without a recorded total estimated cost are ongoing. The entities included in scope for the Capital Statement are listed in Appendix A.

The Capital Statement only provides details of projects being undertaken within Queensland.

CAPITAL CONTINGENCY

Consistent with the approach adopted in previous years, a capital contingency reserve has been included. This reserve recognises that while agencies budget to fully use their capital works allocation, circumstances such as project lead-in times, project management constraints, unexpected weather conditions and capacity constraints such as the supply of labour and materials may prevent full usage. On a whole-of-Government basis, there is likely to be underspending, resulting in a carryover of capital allocations.
