- New waste programs to reduce waste and promote recycling
- \$115 million for solar power projects, including \$5.8 million for solar power in kindergartens

Capital expenditure per person

Queensland State Budget 2010–11

Regional Budget Statement

Greater Brisbane

The 2010-11 State Budget demonstrates our plan to build a recovery is working.

The tough decisions we have taken are strengthening our State's economy and our finances.

While the recovery is now underway, we are not out of the woods yet. Our massive building program will

continue to deliver jobs today and the infrastructure of the future.

Our growing population means we need to invest in more teachers, more police, more health workers and this Budget delivers on our priorities.

A new Regional First Home Owner Boost of \$4,000 for new homes will help guide growth to the regions. Our commitment to building the regions once again sees over 57% of the building program being undertaken outside the Brisbane area.

This State Budget shows we are on track to build a better future.

Anna Bligh MP
Premier
and Minister for the Arts

In a world that is dominated by an uncertain recovery, this State Budget delivers a growing economy and more jobs.

Through strong discipline we

are seeing the deficit and debt lowered and we are on track to return to surplus.

The economic reform agenda

we put in place is working – and we need to stick to our plan in the face of global uncertainty.

Our strategy means we can continue to deliver more hospitals and schools and other vital infrastructure our growing population needs.

Through our determination we are building a stronger economic recovery, delivering jobs and preparing our State for a prosperous future.

Andrew Fraser MP
Treasurer and Minister for Employment
and Economic Development

The Great South East

Effectively managing growth and protecting South East Queensland's lifestyle and environment are critical to our future:

- We are delivering better hospitals, including the new Queensland Children's Hospital in Brisbane, continuing to fund a new tertiary hospital on the Gold Coast, and \$11.6 million on Sunshine Coast health services.
- We are improving public transport in South East Queensland through an investment in 220 new and replacement buses and more than \$850 million on

public transport projects, including the Gold Coast Rapid Transit System, the Eastern Busway, the Station Renovation program and bringing forward the new Springfield Rail Line to 2013.

- We are helping Queenslanders "do the bright thing", with additional funding of \$115 million over 5 years for initiatives that aim to increase support for solar energy, create green jobs, drive community participation in solar programs and encourage investment in solar technologies.

- We are working to halt the decline of SEQ's koala population, with \$45.5 million over five years to deliver the Koala Response Strategy, with the goal of increasing mature koala habitat by 2020.
- We are planning for three new satellite communities at Ripley Valley, Yarrabilba and Flagstone, providing a place to live, work and play for around 250,000 new residents, helping take the pressure off existing residential areas. This Budget delivers new kindergartens at Flagstone and the Greater Springfield area.
