1 Overview

Features

- This Budget Paper presents a consolidation of expense, capital and revenue measures reflecting decisions since the 2014-15 Budget.
- Consistent with its measured and responsible management of the State's finances, the Government has more than offset the cost of its election commitments through reprioritisation measures.
- The measures of the Government reflect its policy agenda of creating jobs and fostering emerging and innovative industries, revitalising front line services and implementing election commitments.
- In the Health portfolio, the Government is providing new growth funding for Queensland Health of \$2.3 billion over four years to support the ongoing growth in demand for health and ambulance services.
- In Education and Training, the Government is investing \$240 million over four years to restore the successful Skilling Queenslanders for Work program.
- In addition to these commitments, the Government is allocating \$500 million towards a State-wide Schools and Hospitals Fund to provide an economic uplift with a focus on health refurbishment and education capital and maintenance projects.
- Operating expenses are forecast to grow at a sustainable rate, averaging 4.1% per annum across the forward estimates (excluding disaster recovery expenses).
- The Government has committed to no new taxes, fees or charges. Already scheduled increases in annual indexation of certain fees and charges, as determined by the previous Government, will continue.

1.1 Introduction

The purpose of this document is to provide a consolidated view of policy decisions with budgetary impacts made by the Government since taking office.

This document complements other Budget Papers, in particular Budget Paper No. 2 – Budget Strategy and Outlook, Budget Paper No. 3 – Capital Statement, Concessions Statement and the Service Delivery Statements.

This paper includes only new policy decisions and does not detail the full amount of additional funding being provided to agencies to deliver services and infrastructure. For example, parameter based adjustments, where the funding formula remains unchanged, are not included.

The total funding impact of new measures is summarised in Tables 1.3 to 1.5 at the conclusion of this chapter. For completeness, these tables also include the funding impact of measures announced by the former Government since the 2014-15 Budget. For details on the total funding available to agencies, refer to agencies' Service Delivery Statements.

1.2 Explanation of scope and terms

The following is a description of the scope and terms applied in this document.

1.2.1 Scope

This document includes measures with the following features:

- **Sector.** Only Queensland General Government sector agencies are included. Measures involving Government-owned corporations or other Public Non-financial Corporations sector agencies are within scope only if the measures are being funded directly by the General Government sector or if there is a flow through effect (for example, Community Service Obligations).
- **Timeframe.** Measures based on decisions made by the Government since taking office.
- **Type.** Measures with budgetary impacts, in particular: (i) expense and capital measures with service delivery, capital enhancement, grant or subsidy impacts on the community; and (ii) revenue measures involving a significant change in revenue policy, including changes in tax rate.

Initiatives of a technical nature or non-policy based adjustments, such as parameter based funding adjustments, are not included if the formula to calculate these adjustments has not changed, as they do not reflect changes in government policy. The main focus is on measures reflecting policy decisions that impact directly on the community through service delivery or other means.

- **Materiality.** Minor measures or measures with non-significant community impact are not included in this document.

1.2.2 Funding basis

Tables in this document are presented on a net funding basis.

- Net funding refers to the impact that the funding of the measure has on appropriations from the Consolidated Fund or centrally held funds to the relevant General Government agency. The tables do not include funding directed to the measure from existing agency resources or other sources.
- Amounts refer to additional funding being provided to agencies for a particular program or project, as a result of Government decisions since the 2014-15 Budget. This may differ to other Budget papers, such as Budget Paper No. 3 – Capital Statement, that may refer to total funding.
- Where a measure involves material expenditure or revenue collections by more than one department, the measure is reported under each department involved. The addition of each individual department's portion of a particular measure may not equate to the reported total whole-of-Government figure due to the omission of some department's portions that did not meet Budget Paper 4's materiality threshold (i.e. \$250,000 over four years).
- Amounts included in the tables relating to revenue measures represent the impact of the measure on Government revenue (with a positive amount representing additional revenue).

Tables 1.3 to 1.5 identify expense, capital and revenue measures separately, categorised as follows:

- Decisions of the current Government
- Decisions of the former Government.

1.3 Funding of election commitments

Consistent with its measured and responsible management of the State's finances, the Government has more than offset the cost of its election commitments through a range of measures as outlined in Table 1.1 below.

The total cost of election commitments is defined as where additional funding from the Consolidated Fund has been appropriated to agencies or a funding contingency has been set up centrally. This excludes any costs associated with election commitments that are funded through other means or funded internally by agencies.

Notes:						
1. Numbers may not add due to rounding.						
2. Details of individual measures are included in the relevant agency sections of this document.						
3. Includes capital and expense measures, and revenue foregone. Individual measures may not add due to some funds being held in a central contingency.						
4. Includes the reprioritisation allocations in Table 1.2, and a general policy contingency sourced from the draw-down of a whole-of-Government general funding contingency held centrally in the 2014-15 Mid Year Fiscal and Economic Review.						

1.3.1 Whole-of-Government measures

The Government has more than offset the cost of its election commitments, totalling \$1.975 billion over five years to 2018-19, through a range of measures. This includes a whole-of-Government reprioritisation allocation of \$1.125 billion over 2015-16 to 2018-19. The allocations for individual portfolios are outlined in Table 1.2 below.

Achieving these allocations will be the responsibility of each Minister, and will be done in a manner consistent with the Government's commitment to public sector job security. There will be no forced redundancies or voluntary redundancy programs in response to reprioritisation measures.

To achieve their reprioritisation target Ministers can reduce discretionary spending in areas such as consultants, contractors and advertising, as well as utilise savings from improvements to productivity and procurement.
